To whom it may concern:

KE2 Connect LLC, hereby requests a Permissive Change Class II of the radio equipment certification for the Edge Manager certification number, FCC ID: 2AOPP-21634. This product differs from the originally approved product in the following manor:

- (a) Reduced Firmware power setting of 802.11N40 protocol from 14dBm of original grant to 10dBm to maintain continuous compliance after Post Market surveillance testing
- (b) Functional capabilities. – no changes
- (c) Antenna Characteristics. – no changes
- (d) Cosmetic differences – no changes

I do attest that the Field strength and/or RF Output readings remained the same or are lower than the originally approved product and that they did not increase therefore qualifying this product for this application type.

A Reduced Firmware power setting of 802.11N40 protocol from 14dBm of original grant to 10dBm to maintain continuous compliance after Post Market surveillance testing.

Sincerely,

A handwritten signature in black ink that reads "Steve Roberts". The signature is written in a cursive, flowing style.

Steve Roberts
Chief Technology Officer
KE2 Connect, LLC.
