We, ABEEWAY, French Manufacturer of product Micro Tracker, we hereby confirm that the design of our Micro Tracker has not changed since the Wifi and BLE tests performed in the end of 2017. Boards used at that time are still in Emitech premises if a confirmation that the design hasn't been modified is needed.

The main reason to explain the delay between the two test sessions is the time to relaunch another PCB production. During the first session, Emitech noticed a 'homemade' modification on the LoRa Antenna. They explained to us that with this modification, the device won't be certified. We then decided to stop the Lora test session and finished Wifi and BLE ones. Unfortunately, the possibility to re-launch a production has taken more time than expected.

Sincerely,  
January 14, 2019
