

The precise wordings are as shown below **GRANT Notes (Requested change)**.

What we are replacing is the statement **"and must not be co-located or operating in conjunction with any other antenna or transmitter"** from the original DHAN-M Grant Notes(See below original DHAN-M wordings) which strongly connotes that DHAN-M cannot be operated with other transmitter devices.

Grant Notes (Requested change)

Modular Approval. Power output listed is conducted. This grant is valid only when the module is sold to OEM integrators and must be installed by the OEM or OEM integrators. The antennas used for this transmitter as shown in this filing must be installed to provide a separation distance of at least 20 cm from all persons. **Co-location of this module with other transmitters that operate simultaneously is required to be evaluated using the FCC multi-transmitter procedures.** OEM integrators and end-users must be provided with transmitter operating conditions for satisfying RF exposure compliance.

OLD GRANT NOTES for (DHAN-M)

)

FCC IDENTIFIER: 2AOUK-DHANM
Name of Grantee: DSP Group Ltd

Modular Approval. Power output listed is conducted. This grant is valid only when the module is sold to OEM integrators and must be installed by the OEM or OEM integrators. The antennas used for this transmitter as shown in this filing must be installed to provide a separation distance of at least 20 cm from all persons and must not be co-located or operating in conjunction with any other antenna or transmitter. End-users may not be provided with the module installation instructions. OEM integrators and end-users must be provided with transmitter operating conditions for satisfying RF exposure compliance.
