UNII Device Declaration Letter

To whom it may concern:

We have declared below featured for FCC equipment authorization, Device FCC ID: 2AOVU-SN8BAXX

(1) DFS Device:

□ Master ■ N/A □ Client with Radar detection capability

Client without radar detection capability,

(2) Active / Passive Scanning , adhoc mode access point capability

Frequency Band (MHz)	Active Scanning (the device can transmit a probe (beacon))		passive scanning (where the device is can listen only with no probes)		Ad Hoc Mode Capability		Access point Capability

⁽³⁾ Country code selection ability □ Yes ☑ No If yes, pls explain how it was implemented:

(5) For client devices that have software configuration control to operate in different modes (active scanning in some and passive scanning in others) in different bands (devices with multiple equipment classes or those that operate on non- DFS frequencies) or modular devices which configure the modes of operations through software, the application must provide software and operations description on how the software and / or hardware is implemented to ensure that proper operations modes cannot be modified by end user or an installer.

(If apply, pls help to provide explanation on it was implement, and how software was controlled)

Sincerely,

ason Zhaw
