# A Quick Look at Your Device

# Charging Your Speaker

Your speaker has a built-in, rechargeable lithium ion battery. To avoid damage, do not attempt to remove the battery. The full performance of the battery is only achieved after a few charging-discharging cycles. Charge the battery fully before first use. To do so, follow the steps below:

1. Connect one end of the included USB charging cable to the charging port on your speaker. Then plug the other end of the USB charging cable into a USB port on your computer or a suitable power adapter in order to recharge the internal rechargeable battery.

**NOTE:** The internal battery of your speaker takes approximately two hours to charge when completely drained.

**NOTE:** Overcharging could reduce the life of the battery. A charged battery will lose its capacity if it is not used on a regular basis.

**Important!**

To avoid a complete discharge of the battery, charge your speaker at least once every six months.

# Pairing Your Speaker with a Bluetooth Device

Your speaker can be paired with most Bluetooth devices so that you can stream music wirelessly. In order to pair your speaker with a phone, follow the steps below:

1. Slide the Control Switch on the rear of your speaker to the Bluetooth position. The LED indicator light will turn blue and blink rapidly. This indicates that your speaker is in pairing mode.
2. Go to the Bluetooth Manager of your Bluetooth device.
3. Search Bluetooth devices and select your speaker (most frequently listed as “Retro speaker”) to start connecting.
4. Enter “0000” if your device asks for the PIN code.
5. Once paired, the LED indicator light will slowly blink blue every few seconds.

# Using the Induction Audio Pad

On the front of your speaker is an Induction Audio Pad. Your speaker uses magnetic induction amplification technology (MIA) so that you can listen to music from your smartphone by simply placing it on the Induction Audio Pad.

1. Slide the Control Switch on the rear of your speaker to the induction position.
2. Play an audio track on your smartphone, and use your phone's volume controls to control the volume level.
3. Place your smartphone so that it rests against your speaker's Induction Audio Pad. For best results, try to line up your smartphone's speaker so that it is as close as possible to the Sensor Point on the audio pad.

**NOTE:** When playing music, volume can be controlled by turning the volume knob. Use the buttons on the front of your speaker to play and pause a track, to advance to the next song in a playlist, or return to the last track.

# Maintenance and Care

-Before using your speaker, inspect the ports to make sure that they are clear of dust and debris before charging..

-Use a soft cloth to clean your speaker. Never use any harsh chemicals or detergents. Make sure your speaker is dry before using.

-When your speaker is not in use, it should be stored in a cool, dry place.

-Never tug or yank on the USB charging cable while it is connected to your speaker. Connect and disconnect all cables as carefully as possible.

-Never expose your speaker to high temperatures, extreme cold, high humidity or excessive moisture or water.

-Please recycle or dispose of your speaker properly based on the laws and rules of your municipality. Contact local recycling facilities and/or the manufacturer of your speaker for further information.

# FCC Statement

Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) this device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation.

If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.
