Re: Request for Limited Modular Approval of FCC ID: 2AOW7-K001

Dear Examiner,

Request for Limited Modular Approval for FCC ID: 2AOW7-K001 as established in KBD 996369 paragraph 2.4 for a currently approved device.

The purpose of this application is for a Class II permissive change. There are two reasons for this change: first is to lower the output power for the Bluetooth and 802.11 bgn radios, second is to change the modular approval to a limited modular approval. The limited modular approval is required because the radio under FCC ID: 2AOW7-K001 was tested at the reduced output power inside of a host.

The host for the 2AOW7-K001 is our product the Connectivity Control Unit, model CCU-2 for which the limited modular approval will apply.

Best regards,

Kent Stalsberg
