FAQ

Why did I fail to add my Smart light strip to the SANTALA app?

1. Make sure your accessory is powered on and nearby.
2. If you use a dual 2.4/5G network router, please turn off the 5G network. Connect your phone with 2.4G network and add the device again.
3. Make sure that the router setting meets the relevant requirements. The device only support the mode of WPA/WPA2-PSK.
4. Make sure the Smart light strip is in pairing mode. If not, please reset light strip to restore factory setting.
5. Select the accessory shown on device, then scan the QR code which can be found on screen, instruction manual or inner packaging.
6. If the app prompts " No Discovered Accessories ", before you scanning the QR code:
 - 1) Close the app.
 - 2) Turn off mobile phone Wi-Fi.
 - 3) Reboot the mobile phone.
 - 4) Turn on mobile phone and turn on mobile phone Wi-Fi.
 - 3) Restore Smart light strip to factory settings
 - 4) Add the device again

◀8

FAQ

The device works normally after restoring factory settings or switching on/off, but it occasionally gets disconnected from the network and can not be recognized.

1. Make sure the number of Wi-Fi connected devices is within the wireless network capacity of your router. Otherwise, please replace with another router.
2. Reconnect you iOS device to Wi-Fi and make sure your Wi-Fi signal is strong enough.
3. Wait until the network is fixed. If your router performs poorly in wireless networks that might result from network congestion.
4. Check the router setting and see if there is any limit to the number of simultaneous client connections.
5. Restart your HomeKit accessory or restore your HomeKit accessory to factory setting, and add your HomeKit accessory to the SANTALA app.
6. Updated firmware to the latest version.

Legal

Use of the Works with Apple HomeKit logo means that an electronic accessory has been designed to connect specifically to iPod touch, iPhone, or iPad, respectively, and has been certified by the developer to meet Apple performance standards. Apple is not responsible for the operation of this device or its compliance with safety and regulatory standards.

◀9

Enabling HomeKit

Connect the USB connector to an adaptor. The Smart light strip will light up to red color (10% bright).It is ready for network setup.

Setup HomeKit:

1. Make sure your iPhone or iPad (iOS latest version) is connected to a 2.4GHz Wi-Fi network. (This product does not support 5GHz Wi-Fi Networks.)
2. Make sure you have at least 3 bars of Wi-Fi signal there.
3. Download the free SANTALA app from the App store and log in.
4. Tap "+" and scan the QR code. Then follow the steps to add the device to the Home and Room. Please keep the QR code for future use.
5. Name this product to help you identify it in the Home app and to control it with Siri. For example, you can name the product " Master Light ", then launch Siri and speak " Turn on the Master Light ".
6. Adjust the brightness by tapping and holding the light strip icon in the app for 2 seconds, then follow APP instruction to adjust the brightness. Or just asking Siri e.g., " Set Master light to 50% ".
7. Create a scene which controls multiple accessories at the same time. Tap the scene to turn it on or off, or just ask Siri. For example, if you assign the " Good Morning " command to the scene of turning off room light and turning on the living room light, when you speak " Good night " to Siri, everything is done.
