 <p>Magnetic Pad</p> <p>Metal Ring</p>	<p>EN</p> <p>For the fast and safe charge, using a Quick Charge 2.0 or 3.0 Wall Charger is highly recommended. Other Chargers may not work well with this device.</p> <p>Attentions</p> <ol style="list-style-type: none"> Please keep the charger away from water or other liquids. Do not place the charger too close to any magnetic stripe or clip card (ID card, bank cards, etc.) to avoid magnetic failure. This item is not to be used on any mobile device with metal plates, as it will cause extreme heat that may burn and/or damage the device. Fast charge via the plug and USB charging cable (both support QC2.0 or QC3.0). Usually we recommend that the thickness of phone case should be within 4mm (0.12 inch). The standard temperature of wireless charger Qi is 55°C, but the temperature of our products should be controlled within 45°C. The charger will cut off current when abnormal heating occurs. Please contact us if any damage occurs. We recommend that you turn off the power-consumption software before charging to effectively prevent the phone from overheating. When the temperature exceeds 45°C during charging, it is normal for the charging speed to slow down. 	<p>DE</p> <p>Für das schnelle und sichere Aufladen wird die Verwendung eines Schnellladegerätes 2.0 oder eines Wandladegerätes dringend empfohlen. Andere Ladegeräte funktionieren möglicherweise nicht gut mit diesem Gerät.</p> <p>Aufmerksamkeiten</p> <ol style="list-style-type: none"> Bitte halten Sie das Ladegerät von Wasser oder anderen Flüssigkeiten fern. Platzieren Sie das Ladegerät nicht zu nah an Magnetstreifen- oder Clip-Karten (ID-Karten, Bankkarten usw.), um magnetische Fehler zu vermeiden. Dieser Artikel darf nicht auf mobilen Geräten mit Metallplatten verwendet werden, da dies zu extremer Hitze führen kann, die das Gerät verbrennen und/oder beschädigen könnte. Schnellladen über Stecker und USB Ladekabel (beide unterstützen QC2.0 oder QC3.0). Normalerweise empfehlen wir, dass die Dicke des Telefongehäuses innerhalb von 4 mm (0,12 Zoll) sein sollte. Die Standardtemperatur des kabellosen Ladegerätes Qi beträgt 55°C, aber die Temperatur unserer Produkte sollte innerhalb von 45°C geregelt werden. Das Ladegerät schaltet den Strom ab, wenn eine ungewöhnliche Erwärmung auftritt. Bitte kontaktieren Sie uns, wenn ein Schaden auftritt. 	<p>FR</p> <p>Pour une charge rapide et sûre, l'utilisation d'un chargeur mural de charge rapide 2.0 ou 3.0 est fortement recommandée. D'autres chargeurs peut-être ne pas fonctionner correctement avec cet appareil.</p> <p>Remarques</p> <ol style="list-style-type: none"> Veillez garder le chargeur éloigné d'eau ou d'autres liquides. Ne placez pas le chargeur trop près d'une bande magnétique ou d'une carte magnétique (carte d'identité, carte bancaire, etc.) pour éviter toute défaillance magnétique. Cet article ne doit pas être utilisé sur un appareil mobile muni de plaques de métal, car cela provoquerait une chaleur extrême susceptible d'endommager l'appareil. Charge rapide via le secteur adaptateur et le câble de chargement USB (les deux compatibles avec QC2.0 ou QC3.0). En général, nous recommandons que lepaisseur du boîtier du téléphone soit inférieure à 4 mm (0,12 pouce). 	<p>ES</p> <p>Para una carga rápida y segura, se recomienda utilizar un cargador de QC 2.0 o 3.0. Otros cargadores pueden no funcionar bien con este dispositivo.</p> <p>Atenciones</p> <ol style="list-style-type: none"> Mantenga el cargador alejado del agua u otros líquidos. No coloque el cargador demasiado cerca de una banda magnética o tarjeta de clip/tarjeta de identificación, tarjetas bancarias, etc.) para evitar fallas magnéticas. Este artículo no debe usarse en ningún dispositivo móvil con placas metálicas, ya que puede provocar un calor extremo que puede quemar y/o dañar el dispositivo. Rápida carga a través del enchufe y el cable de carga USB (ambos son compatibles con QC2.0 o QC3.0). 	<p>IT</p> <p>Per una ricarica rapida e sicura, si consiglia di utilizzare un Rapido Adattatore 2.0 o un Caricabatterie da muro 3.0, altri adattatori potrebbero non funzionare bene con questo dispositivo.</p> <p>Attenzioni</p> <ol style="list-style-type: none"> Si prega di tenere il caricabatterie lontano da acqua o altri liquidi. Non posizionare il caricatore troppo vicino a nessuna banda magnetica o scheda a clip/carte d'identità, carta di credito, ecc.) per evitare guasti magnetici. Questo articolo non deve essere utilizzato su alcun dispositivo mobile con piastre metalliche, in quanto potrebbe causare un calore estremo che potrebbe bruciare e/o danneggiare il dispositivo. 	<p>4. Carica rapida tramite spina e cavo di ricarica USB (entrambi supportano QC2.0/QC3.0).</p> <p>5. Raccogliamo solitamente che lo spessore della custodia del telefono dovrebbe essere entro 4 millimetri (0,12 pollici).</p> <p>6. La temperatura dei nostri prodotti deve essere controllata entro 45°C. Il caricabatterie interrompe la corrente quando si verifica un riscaldamento anomalo. Vi preghiamo di contattarci se si verificano i danni.</p> <p>7. Si consiglia di spegnere il software di consumo energetico prima della ricarica per impedire efficacemente il surriscaldamento del telefono. Quando la temperatura supera 45°C durante la carica, è normale che la velocità di ricarica rallenti.</p> <p>FCC Statement</p> <p><small>This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation. Any changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment. This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment operates on a shared radio frequency band and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures: Reorient or relocate the receiving antenna. Increase the separation between the equipment and receiver. Connect the equipment into an outlet on a circuit different from that to which the receiver is connected. Consult the dealer or an experienced radio/TV technician for help.</small></p> <p><small>FCC RF exposure statement: The equipment complies with FCC radiation exposure limits set forth for an uncontrolled environment. During the operation of device a distance of 15 cm surrounding the device and 20 cm above the top surface of the device must be respected.</small></p>
