

User Manual

please read this manual in detail before use

ASing 2.4G wireless audio transmission device can be connected to: 1. acoustics or speaker with a 3.5mm Aux-In socket; 2. audio device with a 3.5mm aux switch socket.

a receiver only Only receive function. The Receiver connects with audio via a 3.5mm aux-in line; The emitter is of small size to wear or hand-hold. It helps a wire audio to be wireless speaker with crystal voice.

ASing wireless audio transmission device use 2.4GHZ wireless technology with a effective receive range  $\leq 10m$  (under test environment). No direction limits; crystal clear voice transmission and 1 to 1 pairing to avoid interference; signal transmission security is strongly guaranteed. This device is widely used on speaker, audio and professional public address system for wireless public address.

APPLICATION SCOPE  
for wireless public address use

Scope of application	speaker, audio and professional public address system etc. with 3.5mm Aux-In socket or a 3.5mm aux switch socket
Application case	or public address environment, teaching, Dguide, or for sales promotion use

FCC Statement

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation.

This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

To assure continued compliance, any changes or modifications not expressly approved by the party.

Responsible for compliance could void the user's authority to operate this equipment. (Example- use only shielded interface cables when connecting to computer or peripheral devices).

This equipment complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions:

- (1) This device may not cause harmful interference, and
- (2) This device must accept any interference received, including interference that may cause undesired operation.

PRODUCT SPECIFICATION

Frequency response	20kHz~20kHz
Reception range	10M
Battery	changeable lithium battery
working voltage	2.8V-5V
working current	60MA
RF power	0dbm

FUNCTION OVERVIEW
