

Ultra-thin Wireless Car Mount

Automatic
locking & unlocking

Qi
Fast Charging

Adjustable Stand
For 4.7-6.7inch Device

Made in China

Thanks for choosing the multifunctional smart wireless charging car mount. Please carefully read the instruction manual and precautions before using.

How to Use:

Step 1:
Fix the air vent clamp or dashboard holder to the device:

Screw the nut in clockwise direction

Step 2:
Press the button to unlock the air vent clamp; entry and release to grip the air vent.

Tips:

Please match the phone's coil to "Wireless charging area" (check the page 2) by adjusting the bottom stand.

Pull down to adjust the height of foot support

Adjust the bottom stand for different smartphone. (Normally the wireless receiver coil is located in the phone's center.)

Step 2:
Use the Type-C cable packed in the box to connect the device and the car charger.

● To achieve fast charging, QC2.0/3.0 car charger is required.

Step3:
Tap to unlock the touch area and open the arm clip

Step 4:
When a phone or other object is placed into the device, the arm automatically closes and closes. To avoid any hurt, please make sure your fingers are not in the pathway of arms.

Step 5:
To get the phone out of the Device, simply touch the touching area with your finger (see page 1). (NOTE: Short touch is a must and enough; Keep your finger on the touching area will not unlock the arms.)

There is a wireless charging aperture indicator on the front of the body

Aperture indicator State:
Standby: Blue Breath
Charging: The Blue Light is always on
Full charge or abnormal charge: lights out

Power and wireless charging indicator light at lower left corner

Power Supply and wireless charging indicator light status:
Standby: Red Light is always on.
Charging: The Blue Light is always on.
Full charge: lights out.
Foreign body detection: alternating red and blue flashes.
Under-voltage, over-voltage, over-temperature protection: Red Light flashing

Fits Below Supports (Not Included)
Ball Diameter: 16.8±0.3mm

Product Function Specification

- 1.Input: 12V/1.67A; 9V2A; 5V/2A
- 2.Output: 9V/1.67A; 9V/1.12A; 9V/0.83A; 5V/1A
- 3.Operating Temperature:-10 to 60 °C
- 4.Charging Power: 15W (Max); 10W; 7.5W (for iPhone X/8/8+) and 5W.
- 5.Charging Efficiency: 60% to 75%
- 6.Charging Distance: up to 6 mm
- 7.Over Temperature Protection: When charging, if the temperature goes over 60 °C, the device will automatically stop charging and the transmitter light will flash red (one second on/one second off). When the temperature drops to 40 °C, the device will automatically recharge.
- 8.Over voltage protection: when the Device is working at 5W wireless charging, it will automatically stop as soon as the input voltage is over 6V; for 10W wireless, the Device stop charging when input is over 10V; For 15W wireless charging, the Device will stop when the input voltage is over 13V.
- 9.Support WPC Qi wireless charging protocol.
10. FOD function: red & blue lights blink.

Product Function- Instruction

1. Automatic sensing of gravity, no need to manually switch the mobile phone bracket. Easy to operate with one hand
2. Built-in wireless charging transmitter module for mobile phone for wireless charging

Precautions ⚠

- Please carefully handle your charger and accessories, the following recommendations will help you effectively use the warranty service.
- Please keep the equipment dry. Rain, moisture and various liquid may contain minerals that will corrode the circuit. If the equipment is wet, please dry the product as soon as possible or use a soft cloth to wipe it clean. losing the data stored due to demagnetization.

● When charging, please select the QC2.0 or QC3.0 Adapter. Do not use any damaged chargers.

● Please do not charge the equipment that are incompatible with this product.

● Do not store the equipment in a cold place. Otherwise, if temperature rises to normal temperature, moisture will pent up inside it and damage the electric appliance.

● Do not attempt to open the equipment, unauthorized dis-assembly or modification will damage equipment or related wireless charging functions.

● Do not throw, tap or shake the equipment; rough handling of the equipment will damage the internal circuit board and the mechanical structure.

● Use the clean and moist soft cloth to clean the surface of the equipment. Do not use or store the equipment in dusty or dirty places.

● Some components of this product are magnetic and metal materials may be adsorbed onto this product. Please do not use bank cards, credit cards or any other items with magnetic near the product so as to avoid losing the data stored due to demagnetization.

Dashboard Holder:
Dashboard Holder is with an extendable mechanic arm, which allows the phone can be placed at the optimal charging position, achieving the maximum charging electronic current.

Tips:

1. When using this product, please make sure that the product is connected to the power. To achieve fast charging, QC2.0/3.0 car charger is required.
2. If the clamping arm of this product cannot be opened, pull the left and right arms by hand to take out the phone.

FCC Warning

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

Any Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

The equipment complies with FCC radiation exposure limits set forth for an uncontrolled environment. During the operation of device a distance of 15 cm surrounding the device and 20 cm above the top surface of the device must be respected.
