Congratulations on your recent purchase of the LED String Lights. Purchase additional lights to form one continuous string up to 108 feet!

Model#	Length (ft)	Bulb Spacing	Input (watt)	No. Bulb

STEP 1: INITIAL SETUP
1. Carefully unpack String Lights from box, then remove protective film from each bulb. Dispose of film properly (see warning).

2. When installing String Lights outside, a Ground Fault Circuit Interrupter (GFCI) receptacle should be used. Before installing, plug the String Lights into the GFCI receptacle to ensure all lights work properly.
IMPORTANT: Unplug the String Lights prior to mounting.

STEP 2: INSTALLING STRING LIGHTS

1. **IMPORTANT:** Only mount String Lights to a solid support such as joists, beams, studs or other solid mounting surfaces.
2. Each String Light is designed with a universal keyhole for mounting with lights hanging downward. Hardware options (not included) screws, nail, zip ties, hooks and more.

3. Guide wires in compliance with local electrical and building codes may also be used to support the String Lights.
4. Once appropriate GFCI outlet location, mounting surface and hardware are determined, mount your String Lights.
5. When finished mounting, plug the male plug into the GFCI receptacle and place the female receptacle cover firmly over the unused outlet.
6. Drill two (ø8mm) holes into the wall locations. Insert wall anchors (Parts I) into the holes. Then place clips over the wire so wire is completely covered by clip, insert nail (Part H) into clip holes and then insert into wall anchors to secure (use hammer to fully seat nails).
