Subject: Professional Installation of EkkoAir

Model: FS-EA-10

FCC ID: 2AP4G-FS-EA-10

To ensure compliance with Section 15.203 the EkkoAir model FS-EA-10 can only be professionally installed. This is ensured by:

- 1) The EkkoAir is not available to the average consumer because it is only sold as part of Data Centre monitoring system using EkkoSense's EkkoSoft software. The EkkoAir is never sold as a standalone piece of hardware.
- 2) The EkkoAir is not marketed or sold via retail to the general public or by mail order. It is only sold to authorized and trained installers to deploy as part of a complete Data Centre monitoring system.
- 3) The EkkoAir has no application beyond the specific task of monitoring the operation of industrial air conditioning units used in Data Centres.
- 4) Only suitably qualified professional installers are permitted to access Data Centres and work on industrial air conditioning units because of the potential hazards of opening such units and the high security around Data Centres. In addition, the correct positioning and location of the sensors is critical in ensuring that the data measured by the EkkoAir is valid. Consequently, the only people able to install the EkkoAir will be professional installers.

Training is provided to all dealers deploying EkkoSense products. This training includes the methods for installing the EkkoAir product to ensure the data captured is accurate and that only the approved antennas are used.
