

SMART Pepper Spray

PEPPER SPRAY + LOCATION REPORTING + PHONE CALLS + PERSONAL ALARM + STROBE LEDs

4-Year No-Charging Battery Life!

PRESS THE TRIGGER TO SIMULTANEOUSLY ACTIVATE FIVE FUNCTIONS:

Pepper Spray

Maximum strength pepper spray with 10 foot range and up to 10 bursts.

Plegium app
\$1.99/mo.
No binding period!

Location Reporting

Download the Plegium app. Input your emergency contacts. When you fire the SMART pepper spray, the Plegium app immediately sends your location in a text message to your emergency contacts.

Phone Calls

The Plegium app also makes phone calls to your emergency contacts informing them that you are in danger.

Personal Alarm

Ear-piercing 130 dB personal alarm signals for help - stronger than many standalone personal alarms.

19 Hz Strobe LEDs

Triple strobe LEDs illuminates the scene and helps you aim, and the 19 times-per-second blinking disorients the attacker.

*Batteries included.

Designed and Made in Sweden

Plegium® SMART Pepper Spray

PEPPER SPRAY + LOCATION REPORTING + PHONE CALLS + PERSONAL ALARM + STROBE LEDs

Pepper Spray

Maximum strength pepper spray, from SABRE. 10 foot range and up to 10 bursts temporarily blinds the attacker(s). American pepper spray manufacturer SABRE is the #1 choice by police forces worldwide.

Personal Alarm

The 130 dB alarm (stronger than many standalone personal alarms) is activated when the Plegium® SMART Pepper Spray is fired. The alarm draws attention to the scene, increasing chance that the attacker will stop. The SMART Pepper Spray switches between ear-piercing traditional alarm sound and a voice saying "location reported", to further deter the attacker from continuing.

Strobe LEDs

Many attacks happen in low-lit areas. Triple LEDs light up when you fire the Plegium® SMART Pepper Spray, helping you aim to hit the eyes of the attacker. The LEDs have a 19 Hz strobe effect (which means they blink 19 times per second). Strobe blinking has a proven disorienting effect on the human brain.

Location Reporting

Imagine being able to call for help immediately when you are in an assault situation, and immediately receiving the location of your loved ones if they are in danger. This is now a reality thanks to the Plegium® SMART Pepper

Plegium app
\$1.99/mo.
No binding period!

Phone Calls

Upon firing the SMART, the Plegium app will make automated phone calls to your emergency contacts. A voice will inform them that you are in danger and that they have received a text message showing your location.

Spray! When the SMART Pepper Spray is fired, the Plegium app immediately and automatically sends a text message with a Google Maps link showing your location to all emergency contacts put into the Plegium app. The app will then send new text messages with your location after 1, 3 and 5 minutes to make sure your loved ones have your most recent location! Don't gamble on your safety - get the best, from Plegium®!

The Plegium® SMART Pepper Spray has a 4-year no-charging battery life!*

Setup of Location Reporting & Phone Calls

Step 1)

Remove the transparent battery tab from the SMART Pepper Spray.

Step 2)

Download the Plegium app and follow the instructions in the app.

Step 3)

You're all set! Keep the SMART in your pocket/purse.

IMPORTANT!

Keep Bluetooth on and app on in background on phone. Location reporting and phone calls require data coverage.

Internationally Patented

The design of the Plegium® SMART Pepper Spray is internationally patented. The shape of the device has been optimized for a fast, correct grip and activation. Not to mention it is the most beautiful personal safety product on the market!

Flip-Top and Sensory Sight

To avoid accidental triggering, the SMART has a spring-loaded safety lid (a "flip-top"). Also, the trigger has a ridge pointing in the same direction as the spray nozzle. This ridge serves as a "sensory sight", because you can feel with your thumb the direction of the spray stream, improving your aim.

Usage

- Slip thumb under the flip-top lid and press down on the center of the trigger.
- The pepper spray will shoot out of the nozzle, the 130 dB personal alarm and LEDs will activate, and the Plegium app will send your location in a text message to your emergency contacts. The app will also make automated phone calls to your emergency contacts, inform them that you are in danger and that they have received a text message with your location.
- To stop firing the pepper spray, simply release the trigger. The personal alarm will keep sounding and the strobe LEDs will keep blinking until deactivated. To deactivate the personal alarm and strobe LEDs, use a pointed object, such as a pen or pencil point to raise the lever on the side labeled TEST.
- Spray the attacker across the eyes, from ear to ear. Once the eyes are affected, aim for nose and mouth.
- Run to a safe place and call the police.

Test Lever

The Plegium® SMART Pepper Spray is equipped with a TEST button.

The user can test the location reporting, personal alarm and strobe LEDs without firing the pepper spray by pressing down the TEST lever on the side of the product with a pointed object. To turn off the personal alarm and the strobe LEDs simply push the lever back up. All text messages and phone calls are included in the monthly app subscription cost.

FCC Caution:

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

Any Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

Note: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.
