

### Smart Switch User Manual

Model Number: **SS118-01K1**  
 Power Supply: **AC120V**  
 Rated Frequency: 60Hz  
 Max. Current: 10A/240V/gang  
 Max. Power: 800W/gang  
 WiFi: IEEE 802.11 b/gn  
 Wireless Standard: WiFi 2.4GHz  
 App Support: iOS/Android

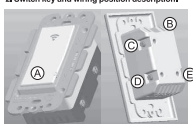

#### 1. Tools You Will Need

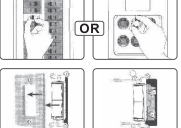

**IMPORTANT**

The fixture controlled by the wifi in-wall smart switch must not exceed 800 watts (incandescent); 800w (10A) Resistive or hp motor. The switch is designed only for use with permanently installed fixtures.

#### 2. Switch key and wiring position description.

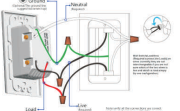

#### 3. Switch wiring installation

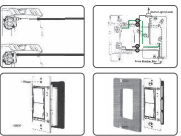

**Warning: shock hazard**  
 Turn off the power to the branch circuit for the switch and lighting fixture at the service panel. All wiring connections must be made after power down to avoid personal injury and/or damage to the switch. This device is intended for installation in accordance with the national electric code and local regulations in the United States, or Canadian electrical code and local regulations in Canada. If you are unsure or uncomfortable about performing the installation, consult a qualified electrician.

**Multi-switch wiring**  
 For 3-way installation, please refer to add-on manual single switch wiring before you start; you may wish to change the paddle color to match your wallplate or decor, please proceed to section 5.

#### 4. Installation Instruction

 Single, dual and triple gang boxes, if may be necessary to switch off one or both sides of the second side on the front yoke. This does not affect the electrical rating of the smart switch referring to the specifications for details

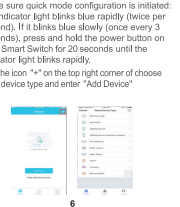

Simplified steps to install the App on your smart device and pair with Amazon Alexa, Google Assistant and IFTT using Smart Life App on Apple Store/Google Play Store. Compatible with any smart phone or tablet including both Android and iOS systems.

1. Download Smart Life from iOS APP Store or  .  
 Download or scan the QR code and install the Smart Life App for either iOS or Android.  
 Once downloaded, the app will ask you to register your device. Enter your phone number or email which ever one makes you feel comfortable and select the country you live in. If phone number selected you will receive a text with a registration code. If you choose email you will then create a password.

**Attention: There's no Registration code needed if email method chosen.**

#### 5. Quick Mode Configuration (Common)

1. Make sure quick mode configuration is initiated: the indicator light blinks blue rapidly (twice per second). If it blinks blue slowly (once every 3 seconds), press and hold the power button on your Smart Switch for 20 seconds until the indicator light blinks rapidly.  
 2. Tap the icon "\*" on the top right corner of choose your device type and enter "Add Device"

#### 6. Follow the in-app instructions to connect the Smart Switch to your Wi-Fi network.

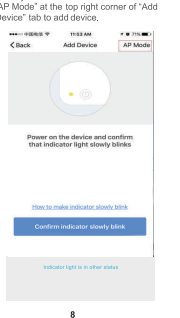

3. Follow the in-app instructions to connect the Smart Switch to your Wi-Fi network.

4. Once connected, the App will prompt the connection, and click "Done".  
 5. Now you can control the smart switch through Smart Life App.  
 6. Once the configuration is completed successfully, the indicator light will turn to solid red and the device will be added to the "Device List".

#### AP Mode Configuration

1. Make sure AP mode configuration is initiated: the indicator light blinks blue slowly (once every 3 seconds). If it blinks blue rapidly (twice per second), press and hold the power button on your Smart Switch for 20 seconds until the indicator light blinks slowly.  
 2. Tap the icon "\*" on the top right corner of choose your device type and enter "Add Device"

#### 7. Follow the in-app instructions to connect the Smart Switch to your Wi-Fi network.

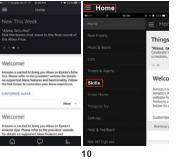

3. Follow the in-app instructions to connect the Smart Switch to your Wi-Fi network.

4. Once connected, the App will prompt the connection, and click "Done".  
 5. Now you can control your Smart Switch through Smart Life App.  
 6. Once the configuration is completed successfully, the indicator light will turn to solid red and the device will be added to the "Device List".

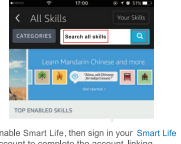

Please note: you can add the Smart Switch to Echo/Google Home following this instructions below, or one on the App (Open Smart Life App, go to "Profile" -> "Integration", tap "Amazon Echo" or "Google Home" and install).

#### How to connect your Smart Switch to Amazon Alexa

1. Launch Smart Life App, sign in your account and make sure your Smart Switch is in your device list.  
 2. Name each device, such as living room light or bedroom light, so that Alexa can easily recognize them.  
 3. Minimize Smart Life App, then launch the Alexa App and sign in your Alexa account and make sure you have at least one Alexa voice-controlled device installed like Echo, Echo dot, etc.  
 4. In the upper left corner of Home page, click  button to show App menu. Then clicks  in the menu.

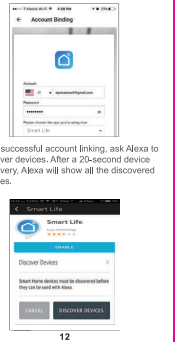

#### 5. Type in "Smart Life" in the search and click the search button.

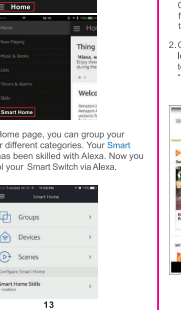

6. Enable Smart Life, then sign in your Smart Life account to complete the account linking.

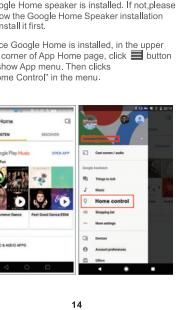

#### 7. After successful account linking, ask Alexa to discover devices. Alexa will show all the discovered devices.

#### 8. Back to Menu by clicking button, and then click button.

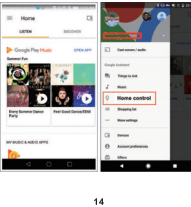

#### 9. In Smart Home page, you can group your devices for different categories. Your Smart Life APP has been skilled with Alexa. Now you can control your Smart Switch via Alexa.

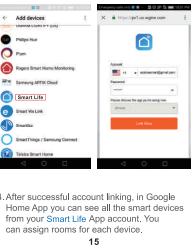

#### How to connect your Smart Switch to Google Home

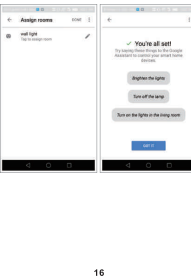

1. Launch the Google Home App and make sure Google Home speaker is installed. If not, please follow the Google Home Speaker installation to install it first.  
 2. Once Google Home is installed, in the upper left corner of App Home page, click  button to show App menu. Then clicks "Home Control" in the menu.

#### 3. On "Add devices" page, scroll down to find "Smart Life" and then click it. Sign in Smart Life App with your Smart Life App account and password choose Smart Life App in the dropdown menu to complete the account linking.

#### 5. Now you can use Google Home to control your smart devices, you can say like: Ok Google, turn on/off wall light Ok Google, set bedroom light to red

#### 4. After successful account linking, in Google Home App you can see all the smart devices from your Smart Life App account. You can assign rooms for each device.

#### 2. What should I do when I cannot turn Smart Switch on or off?

- Make sure your mobile devices and the Smart Switch are connected to the same WiFi network.
- Make sure the devices connected to the Smart Switch are turned on.

#### 3. What should I do when device configuration process has failed?

You could:

- Check whether the Smart Switch is powered on or not.
- Check whether your mobile device is connected to 2.4GHz WiFi network.
- Check your network connectivity. Make sure the router is working properly.
  - If the router is dual-band router, select 2.4G network and then add Smart Switch.
  - Enable the router's broadcasting function.
  - Configure the encryption method as WPA2-PSK and authorization type as AES.
  - or set both as auto.
  - Wireless mode cannot be 11n only.

#### Troubleshooting and FAQ

##### 1. What devices can I control with the Smart Switch?

You can control lights in accordance with the Smart Switch specifications.

##### 2. What should I do when I cannot turn Smart Switch on or off?

- Make sure your mobile devices and the Smart Switch are connected to the same WiFi network.
- Make sure the devices connected to the Smart Switch are turned on.

##### 3. What should I do when device configuration process has failed?

You could:

- Check whether the Smart Switch is powered on or not.
- Check whether your mobile device is connected to 2.4GHz WiFi network.
- Check your network connectivity. Make sure the router is working properly.
  - If the router is dual-band router, select 2.4G network and then add Smart Switch.
  - Enable the router's broadcasting function.
  - Configure the encryption method as WPA2-PSK and authorization type as AES.
  - or set both as auto.
  - Wireless mode cannot be 11n only.

##### 4. Can I control device through 2G/3G/4G cellular network?

The Smart Switch and the mobile device are required to be under the same WiFi network when adding the Smart Switch for the first time. After successful device configuration, you can remotely control the device through 2G/3G/4G cellular network.

##### 5. How can I share my device with family?

Open your App, go to "Profile" => "Device Sharing" => "Share", tap "Add Sharing", now you can share the device with addoed family members.

##### 6. How to reset this device?

Factory reset: After Smart Switch is plugged into a power switch, press and hold (for 20 seconds) the power button for factory reset. (the indicator light blinks blue rapidly/Indicator Lighting pattern:

- Quick blinking blue (twice per second): Quick mode configuration is initiated.
- Slow blinking blue (once every 3 seconds): AP mode configuration is initiated.

The indicator light could turn to solid red from any other status (quick/slow blinking blue, solid blue or off) by pressing the power button once and return to the previous status from solid red status (power is switched off) by pressing power button once again.
- Off: The Smart Switch is switched off and no Wi-Fi network.

**Warning:**

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) this device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

NOTE: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

NOTE: This device and its antenna(s) must not be co-located or operation in conjunction with any other antenna or transmitter

**RF Exposure Statement**

To maintain compliance with FCC's RF Exposure guidelines, This equipment should be installed and operated with minimum distance of 20cm in the radiator your body. This device and its antenna(s) must not be co-located or operation in conjunction with any other antenna or transmitter
