

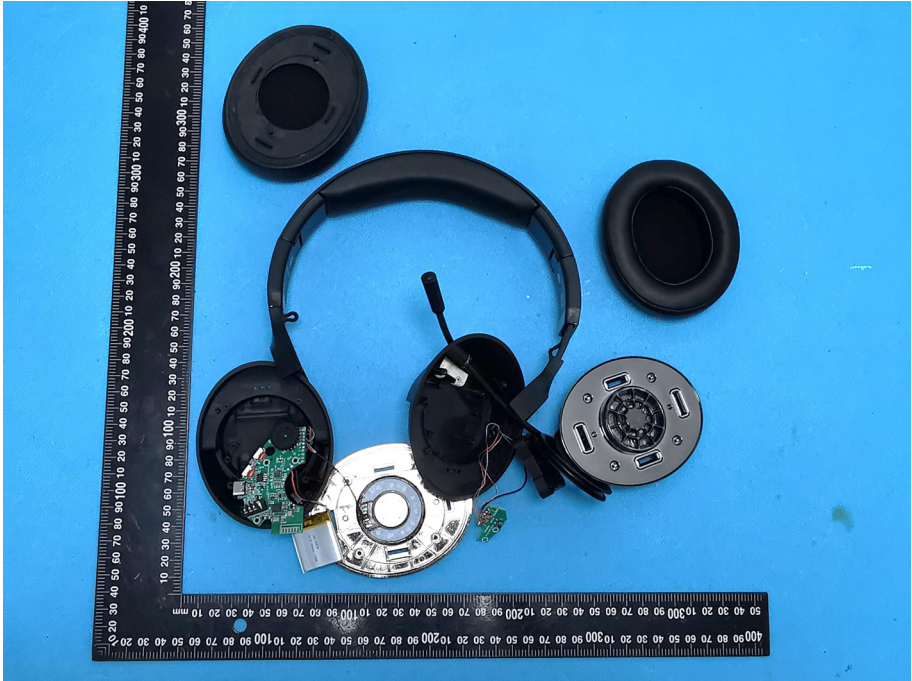

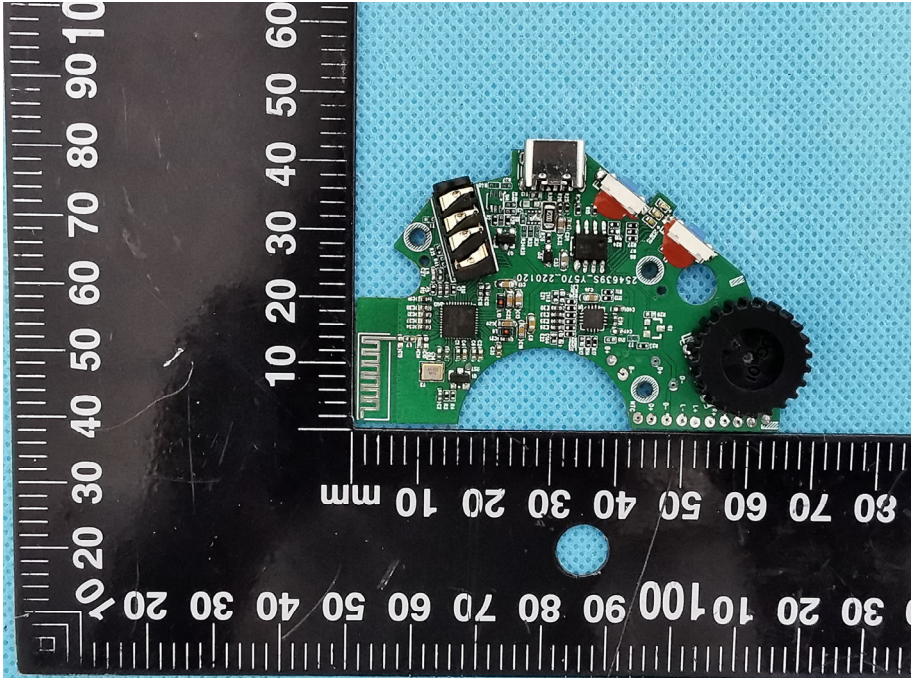

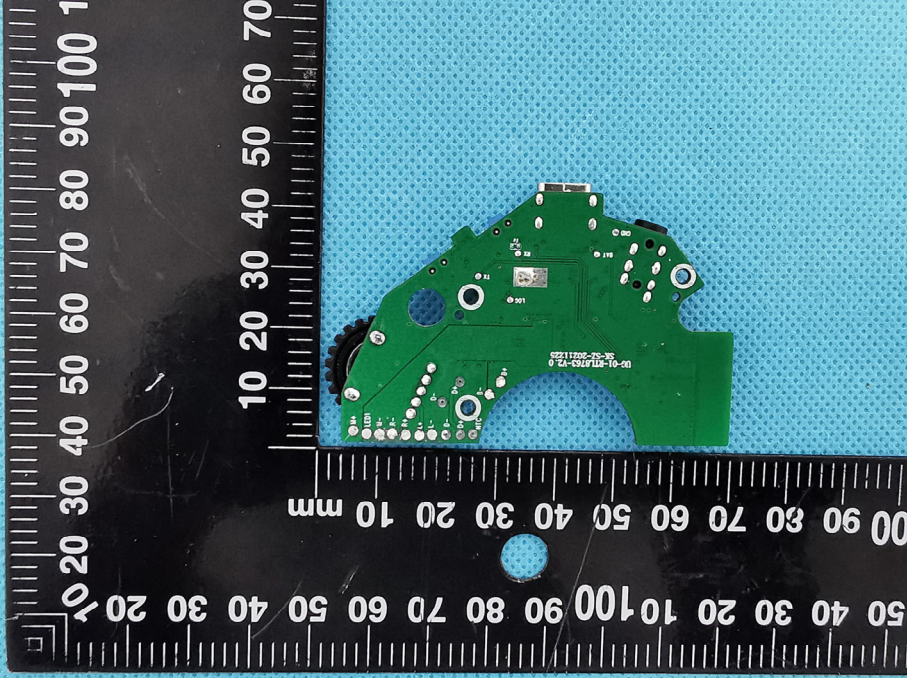

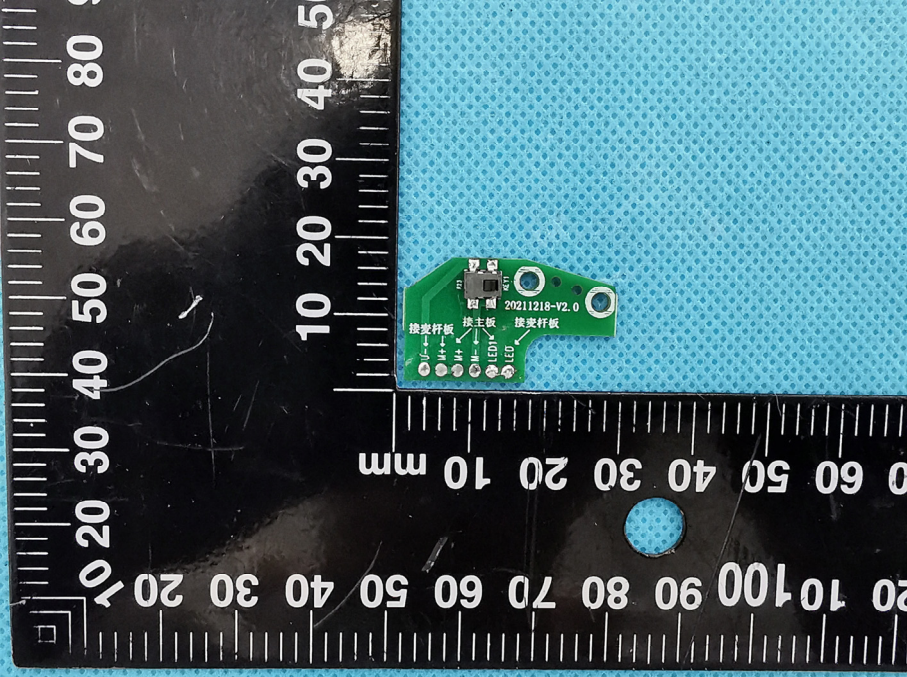

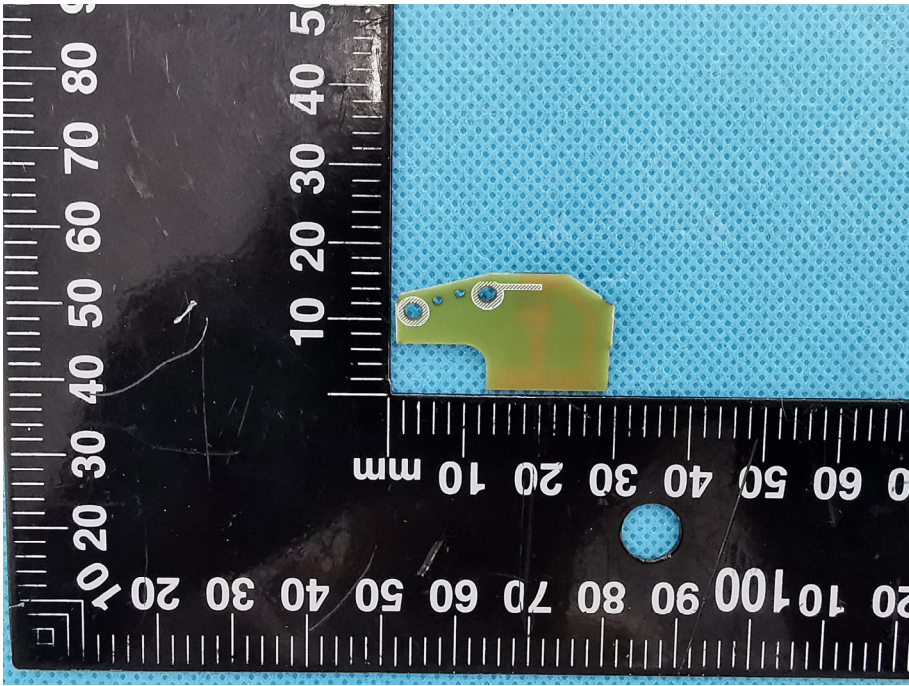

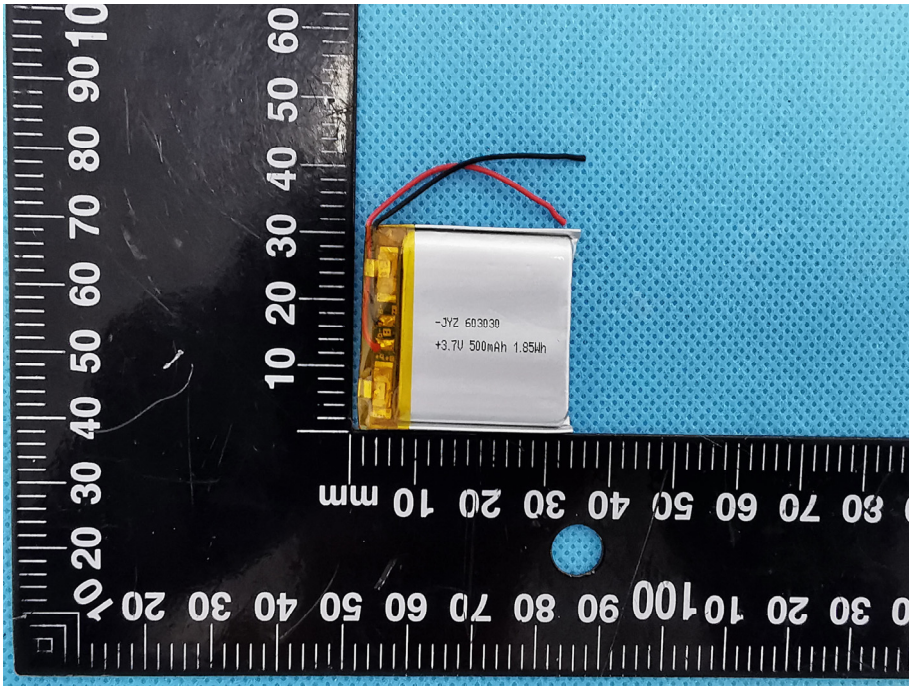

### EXHIBIT 3 - EUT INTERNAL PHOTOGRAPHS

<p><b>EUT Housing and Board View 1</b></p>	 A photograph showing the disassembled components of an EUT (End User Terminal) on a blue background. The components include a black plastic headband, two black circular earpieces, a green printed circuit board (PCB) with various electronic components, and two circular metal speaker drivers. A black L-shaped ruler is placed next to the components for scale, with markings in millimeters.
<p><b>Solder Board-Component View 1</b></p>	 A close-up photograph of the green PCB from the previous view, showing various electronic components such as a USB port, a microcontroller, and a black gear-like component. The PCB is placed on a blue textured surface. A black ruler is positioned around the PCB for scale, with markings in millimeters.

<p style="text-align: center;"><b>Solder Board-Component View 2</b></p>	 <p>A photograph of a green PCB component, labeled '2', placed on a black ruler for scale. The component is irregularly shaped with various solder points and components. The ruler shows measurements in millimeters, with the component's length being approximately 100 mm and its width around 40 mm. The background is a blue textured surface.</p>
<p style="text-align: center;"><b>Solder Board-Component View 3</b></p>	 <p>A photograph of a smaller green PCB component, labeled '3', placed on a black ruler for scale. The component is rectangular with several solder points and components. The ruler shows measurements in millimeters, with the component's length being approximately 40 mm and its width around 10 mm. The background is a blue textured surface.</p>

<p>Solder Board-Component View 4</p>	 A photograph showing a small, irregularly shaped green component with two circular solder joints on a blue perforated PCB. The component is positioned next to a black ruler with white markings. The ruler shows measurements in millimeters, with the component's length being approximately 15 mm and its width about 10 mm. The background is a blue perforated surface.
<p>Solder Board-Component View 5</p>	 A photograph showing a rectangular lithium battery component with two wires (red and black) attached to its top. The battery is mounted on a blue perforated PCB. The battery label includes the text: "-3VZ 603030" and "+3.7V 500mAh 1.85Wh". The component is positioned next to a black ruler with white markings. The ruler shows measurements in millimeters, with the battery's length being approximately 40 mm and its width about 15 mm. The background is a blue perforated surface.
