ADVANCED FEATURES

And even more !

- Auto-crop
- Auto-compress
- Auto-upload
- Sharpness control
- Anti-reflection
- Curve fixing
- Battery life of 8h
- 2,000 pages offline memory
- OCR to text (to Word)
- Color or Black & White
- High level security
- Wireless
- 7,0 oz (200 g)
- A3 to A8

Page 3

Paper	A3	A4	A5	A6	A7	A8
Size cm (inch)	29,7 x 42 (16,5 x 11,7)	21 x 29,7 (11,7 x 8,3)	14,8 x 21 (8,3 x 5,8)	10,5 x 14,8 (5,8 x 4,1)	7,4 x 10,5 (4,1 x 2,9)	5,2 x 7,4 (2,9 x 2)
Same as	Small poster	Invoice, Magazine...	Wish card	Postal card	Bill	Visit card

SETUP

To activate the PUP it is very simple

1 Register online

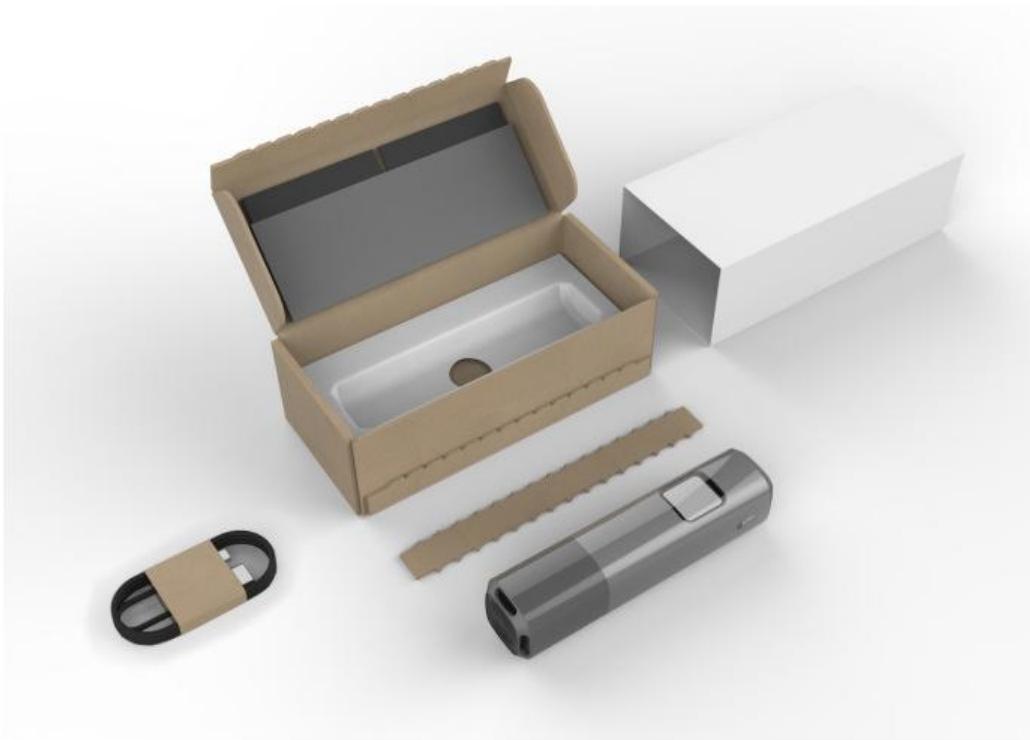

2 Scan the QR code

That's it ! The PUP is ready to go.

CURVE FIXING

PupScan automatically fixes page curvature and deformation.

QUESTIONS AND ANSWERS

What is the resolution of the Pup?

PUP Scan offers a resolution of 13,2 megapixels, and up to 1 000 DPI.

What color will be the first Pup?

PUP Scan will be available in electric blue, gold, black, grey and gold pink.

What is the Mozaic feature?

Some people are interested in very large format, such as A2 (large poster dimensions). In this situation, we offer you a way to capture as many HD slices of the image as needed. Then you can ask the Pup to compute and render the whole image by assembling the parts.

Page 8

Can I scan to Word?

Yes, we are providing OCR feature. It will extract text fragments from your image and allow you to import them into Word.

What is the difference between the smartphone and PUP?

There are many differences between PUP and your smartphone :

- Speed: the PUP is three times as fast as your smartphone.
- Quality: with PUP your scan will always be perfect (auto-crop, no reflection, no shadow, correct the curvature issue)
- PUP is able to scan all sizes of documents.

FCC Statement

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions:

- (1) This device may not cause harmful interference.
- (2) This device must accept any interference received, including interference that may cause undesired operation.

2. Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

Note: This equipment has been tested and found to comply with the limits for a class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation.

This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

Specific Absorption Rate (SAR) information:

This PUPSCAN meets the government's requirements for exposure to radio waves.

The guidelines are based on standards that were developed by independent scientific organizations through periodic and thorough evaluation of scientific studies. The standards include a substantial safety margin designed to assure the safety of all persons regardless of age or health.

FCC RF Exposure Information and Statement The SAR limit of USA (FCC) is 1.6 W/kg averaged over one gram of tissue. Device types: PUPSCAN

(FCC ID: 2APCWPUPSCAN) has also been tested against this SAR limit. The highest SAR value reported under this standard during product certification for use properly worn on the body is 0.67W/kg. This device was tested for typical body-worn operations with the back of the handset kept 0cm from the body. To maintain compliance with FCC RF exposure requirements, use accessories that maintain a 0cm separation distance between the user's body and the back of the handset. The use of belt clips, holsters and similar accessories should not contain metallic components in its assembly. The use of accessories that do not satisfy these requirements may not comply with FCC RF exposure requirements, and should be avoided.
