

EXHIBIT 4 - TEST SETUP PHOTOGRAPHS

Conducted Emission Test Setup	 A photograph showing a conducted emission test setup. A power supply unit is connected to a device under test (DUT) on a wooden table. A power line coupler is also visible on the table. The background is a plain wall with a power outlet.
Radiation Emission Test Setup (Below 30MHz)	 A photograph showing a radiation emission test setup. A device under test (DUT) is placed on a table inside a shielded room. The walls of the room are covered with white, square-shaped absorbers. A bright light source is visible in the upper left corner of the room.

Radiation Emission Test Setup (30MHz to 1GHz)	 A photograph of a radiation emission test chamber. The interior walls are covered with white, square-shaped anechoic tiles. A metal probe is positioned in the upper left corner, emitting a bright blue light. A white, rectangular test fixture is placed on a black platform in the center of the chamber.
Radiation Emission Test Setup (1GHz to 18GHz)	 A photograph of a radiation emission test chamber. The interior walls are covered with white, square-shaped anechoic tiles. A white, rectangular test fixture is placed on a black platform in the center of the chamber. A red, curved object is visible on the left side of the chamber. The floor is covered with blue, conical-shaped anechoic tiles.

**Radiation Emission Test
Setup (Above 18GHz)**

*** Means' only test and setup for PART 15C .**
