To whom it may concern,

This is a note to describe the compliance of our antenna design for our RBS101 multipurpose sensor to be compliant with FCC Part 15.203. According to this section, "The use of a permanently attached antenna or of an antenna that uses a unique coupling to the intentional radiator shall be considered sufficient to comply with the provisions of this section."

Since the RBS101, uses a permanently attached ceramic antenna on the printed circuit board, it is not possible for the end user to change the antenna and therefore we are in compliance with this section.

Thank you.
