

<p style="text-align: center;">Solder Board-Component View 6</p>	 <p>A photograph showing a small green printed circuit board (PCB) component. The component is L-shaped and has several circular holes and a small rectangular feature. It is placed on a black surface with a white ruler for scale. The ruler shows markings in millimeters, with the component positioned between the 10 mm and 40 mm marks. The background is a light blue textured surface.</p>
<p style="text-align: center;">Solder Board-Component View 7</p>	 <p>A photograph showing a larger green PCB component. This component is more complex, featuring a rectangular shape with several circular holes, a small rectangular feature, and a larger rectangular feature. It is placed on a black surface with a white ruler for scale. The ruler shows markings in millimeters, with the component positioned between the 10 mm and 50 mm marks. The background is a light blue textured surface.</p>

<p>Solder Board-Component View 8</p>	 A photograph showing a small green printed circuit board (PCB) component. The component is rectangular with several circular solder pads and a small notch on one side. It is placed on a blue textured surface. A black ruler with white markings is positioned below the component, showing measurements in millimeters. The ruler has markings from 0 to 100 mm, with the component's length being approximately 40 mm.
<p>Solder Board-Component View 9</p>	 A photograph showing two rectangular battery components connected by a black fabric strap. Each battery has a white label with technical specifications and a barcode. The batteries are placed on a blue textured surface. A black ruler with white markings is positioned below the batteries, showing measurements in millimeters. The ruler has markings from 0 to 100 mm, with the batteries' length being approximately 100 mm.
