

Not Connecting to the Internet?

Night Owl strongly recommends connecting the WNVR to the Internet. If you have decided not to connect, follow the onscreen prompts within the Startup Wizard. Please note that not connecting your WNVR means:

- You must manually update the device's firmware to the latest version to receive Technical Phone Support. The latest firmware version is available on the device's support page on the Night Owl Support Site.
- The WNVR must be registered to receive Technical Phone Support.
- You cannot view your system remotely.
- Resetting your password is a much longer process to ensure security.

Need More Help?

For system manuals, troubleshooting guides, FAQs, video tutorials and more:

- 1 Please visit **Support.NightOwlISP.com**
- 2 Enter the Series listed on the Product Support Sticker (on top of the WNVR) into the Search bar.
- 3 Access the support material needed.

FCC RADIATION NORM
 FCC
 This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions:
 (1) this device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.
 FCC Compliance Statement: These limits are designed to provide reasonable protection against frequency interference in residential installation. This equipment generates, uses, and can radiate radio frequency energy, and if not installed or used in accordance with the instructions, may cause harmful interference to radio communication. However, there is no guarantee that interference will not occur in television reception, which can be determined by turning the equipment off and on. The user is encouraged to try and correct the interference by one or more of the following measures:
 • Reorient or relocate the receiving antenna.
 • Increase the separation between the equipment and the receiver.
 • Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
 • Consult the dealer or an experienced radio/TV technician for help.
CAUTION!
 The Federal Communications Commission warns the user that changes or modifications to the unit not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.
 This equipment should be installed and operated with a minimum distance of 8 inches between the radiator and your body.

Night Owl Technical Support

Still need more support? Before calling Night Owl Technical Support, keep in mind we can only provide phone support if:

- 1 Your device is running the latest firmware version.
- 2 Your device is registered. To register your device:
 - a Download Night Owl Protect from your Smart Device's App Store.
 - b Click "Sign Up" to create an account.
 - c Go to www.no-protect.com and manually register your device.
- 3 You are in front of the device with it powered on.

Thank you for being a Night Owl Customer! Secure, Protect, Connect your world!

DISCLAIMER: The exact components of your system, images, and quantities may vary depending on your model number. While these may vary, this QSG addresses the setup of your WNVR and cameras. While we make every effort to provide accurate information, inaccuracies or errors may occur. We reserve the right to make changes, corrections, and/or improvements to the information and to the products, at any time without notice.

NOTE: If connecting to a TV or Monitor (Not Required), it must have a minimum resolution of 1080p HD. Use all of the included Night Owl accessories. Third-party accessories may not work correctly.

Items Not Included

Contents will vary depending on the product(s) you are adding to the Recorder.

Model #:	Series:	AC Powered
WNIP-8LTA-BS-U	WNIP2 / WNIP8	Wire Free Camera(s)
WNIP-8LTA-BS	BWNIP2	Wire Free Camera(s)
WNIP-2LTA-BS-U	BWNIP-2TA-BS	Smart Doorbell
WNIP-2LTA-BS	DB-WNIP2	Smart Doorbell
WNIP-2LTA-BS-U	DB-WNIP2-SU	Smart Doorbell

What's in the Box

Step 1: Connecting Your System

NOTE: Watch our Recorder Setup Video on YouTube.

Option 1: Easy Bluetooth® Wireless Setup

With our easy Bluetooth® wireless setup, no TV / Monitor is required. Once your system is connected using the steps below, you can quickly finish the setup right from the app on your Smart Device. This is the preferred setup method for your system. Please proceed to step 1.

NOTE: You may still use a TV / Monitor, it is just not required for initial setup.

Option 2: Manual Setup (TV / Monitor)

While our easy Bluetooth® wireless setup is preferred, you may still want to locally view your system from a TV / Monitor. The choice is yours based on your setup needs. If you want to connect a TV / Monitor, complete the two steps below then continue to finish connecting your system.

Plug one end of the included HDMI cable into the HDMI port on the back of the WNVR. Plug the other end of the cable into your TV or Monitor.

NOTE: To view cameras, TV or Monitor must be tuned to the same input the HDMI is plugged into.

Plug the USB mouse into the USB port on the back of the WNVR.

Follow The Steps Below to Continue Setting up your System For Both Options

1

Plug one end of the included Ethernet cable into the LAN port on the back of the WNVR.

NOTE: Night Owl recommends connecting to the Internet for the best user experience.

2

Router / Network Access Point (NOT INCLUDED)

Plug the other end of the Ethernet cable into a port on the back of your router / network access point.

NOTE: As long as your WNVR is hardwired using Ethernet cabling, you can connect to any working network access point. See your product manual for more details.

3

Connect the WNVR power adapter to the Power Input on the rear of the WNVR.

4

SURGE PROTECTOR (NOT INCLUDED)

Plug the WNVR power adapter into a surge protector or Uninterruptible Power Supply (UPS). Some systems beep upon booting up.

NOTE: Make sure the UPS or surge protector is switched ON.

IMPORTANT: Your Wi-Fi NVR is compatible with our AC Powered Wi-Fi IP Cameras, Wire Free Cameras (4 MAX) and Smart Video Doorbell. Please use your Smart Device's camera to scan the QR Code for a quick and easy-to-follow setup video based on the type of device you will be adding.

5

Series: WNIP2 / WNIP8
Model #'s: WNIP-2LTA-BS, WNIP-2LTA-BS-U, WNIP-2LTAW-BS-U, WNIP-8LTA-BS, WNIP-8LTA-BS-U

Scan the QR Code to view the WNVR and AC Powered Wi-Fi IP Camera Setup Video.

6

Series: BWNIP2
Model #'s: BWNIP-2TA-BS, BWNIP-2TA-BS-V2

Scan the QR Code to view the WNVR and Wire Free Camera Setup Video.

7

Series: DB-WNIP2
Model #: DB-WNIP2-SU

Scan the QR Code to view the WNVR and Smart Doorbell Setup Video.

Step 2: Download Night Owl Protect

2a If you're a First Time User, download Night Owl Protect from the App Store or Google Play Store onto your Smart Device. If you already have an account skip to Step 3.

NOTE: Setup is the same for Smartphone and Tablet.

2b Create and verify your Night Owl Protect account. Proceed to Step 3.

Step 3: System Configuration

Now that your system's hardware is connected and you have the app setup on your Smart Device, it is time to configure your system. Based on whether you chose Option 1: Easy Bluetooth® Wireless Setup or Option 2: Manual Setup (TV / Monitor), follow the steps below.

Option 1: Easy Bluetooth® Wireless Setup

NOTE: If you have a TV / Monitor connected, you will see setup information appear on the screen as you complete the Bluetooth® setup. A TV / Monitor is not required for this setup, but can be used for viewing.

1 Log in to the app. If your device's Bluetooth® is not enabled, you will be asked to allow access.

2 The app will now use Bluetooth® to find the WNVR. Tap "Continue" to add the WNVR to your Night Owl Protect account.

3 Take a moment to name your recorder.

4 The app will now pair to the WNVR. Once finished, complete the remainder of the Startup Wizard right from the app and begin viewing your cameras.

NOTE: If the WNVR is not connected to the Internet, you will not be able to live view the cameras from the app.

Option 2: Manual Setup (TV / Monitor)

NOTE: Connecting your system and using the Night Owl Protect App is preferred and offers added security benefits and convenience to your mobile lifestyle.

We strongly recommend you connect your WNVR to the Internet to search for the latest firmware. Keeping your firmware updated is vital for the overall health of your system. If you are NOT connecting your WNVR to the Internet, please manually upgrade the firmware and register your device.

1 If you have not already done so, connect your WNVR to a TV / Monitor using the provided HDMI cable. Follow the steps in Connecting Your System.

2 You will now begin the Startup Wizard. When you get to the following screen, click "Manual Setup (not recommended)."

3 Proceed through the rest of the Startup Wizard to finish setup. Once complete, click on "Go to Live View" to begin viewing your cameras.
