1. Instale las antenas celulares.

2. Con los contactos dorados hacia abajo, desliza suavemente la tarjeta nano SIM en la ranura SIM1 hasta que escuches un clic.

3. Conecte el adaptador de corriente al enrutador.

4. Encienda el enrutador. Esperando 2 ~ 5 minutos para que comience.

5. Verifique el estado del LED.

Cuando el LED se vuelve azul o morado fijo, significa que el enrutador está conectado a la red celular.

Si el LED se vuelve rojo fijo, siga las instrucciones de [Personalizar el enrutador](#).

Nota:
Para la tarjeta SIM de algunos ISP (como Verizon), puede llevar más tiempo conectarse a Internet. Espere otros 2 ~ 5 minutos.

Installazione Veloce (Italiano)

1. Installare le antenne cellulari.

2. Con i contatti dorati rivolti verso il basso, fai scorrere delicatamente la scheda nano SIM nello slot SIM1 finché non senti un clic.

Nota 1: Il router non supporta la sostituzione a caldo della SIM. È necessario inserire o rimuovere la scheda SIM mentre il router è spento, altrimenti potrebbero danneggiarsi.

Nota 2: Se entrambi gli slot per schede SIM1 e SIM2 sono inseriti con schede SIM, il router sceglierà automaticamente quale scheda SIM utilizzare. Poiché il meccanismo di selezione automatica richiede molto tempo, si consiglia vivamente di inserire una sola scheda SIM al primo utilizzo.

3. Collegare l'alimentatore al router.

4. Accendere il router. Attendere 2~5 minuti per l'avvio.

5. Controllare lo stato del LED

Quando il LED diventa blu o viola fisso, significa che il router è connesso alla rete cellulare.

Se il LED diventa rosso fisso, seguire le istruzioni di [Personalizza il router](#).

Nota: Per alcune schede SIM di ISP (come Verizon), la connessione a Internet potrebbe richiedere più tempo. Si prega gentilmente di attendere altri 2~5 minuti.

Personalizza il router

1. Collegare il router tramite cavo ethernet o Wi-Fi. Il nome della rete e la password sono stampati nella parte inferiore del router.

2. Avviare un browser Web e immettere <http://cudy.net/> (o <http://192.168.10.1/>) nella barra degli indirizzi, utilizzare **admin** come password per accedere.

3. La pagina sottostante si aprirà se la tua carta SIM necessita di un PIN per sbloccare. Inserisci il tuo PIN e fai clic su Salva e applica, quindi attendi 15 secondi per connetterti a Internet.

4. Quindi controlla la scheda informativa cellulare della pagina di stato Se lo stato è connesso, significa che la connessione a Internet è riuscita.

Installation Rapide(Français)

1. Installez les antennes cellulaires.

2. Avec les contacts dorés vers le bas, faites glisser doucement la carte nano SIM dans la fente SIM1 jusqu'à ce que vous entendiez un clic.

Noter 1: Le routeur ne prend pas en charge le remplacement à chaud de la carte SIM. Vous devez insérer ou retirer la carte SIM lorsque le routeur est éteint, sinon elle risque d'être endommagée.

Noter 2: Si les deux emplacements pour cartes SIM1 et SIM2 sont insérés avec des cartes SIM, le routeur choisira automatiquement la carte SIM à utiliser. Le mécanisme de sélection automatique étant chronophage, il est fortement recommandé de n'insérer qu'une seule carte SIM lors de la première utilisation.

3. Connectez l'adaptateur secteur au routeur.

4. Allumez le routeur. Attendez 2 à 5 minutes pour qu'il démarre.

5. Vérifiez l'état de la LED

Lorsque le LED devient bleu ou violet fixe, cela signifie que le routeur est connecté au réseau cellulaire.

Si le LED devient rouge fixe, veuillez suivre les instructions de [Personnaliser le routeur](#).

Noter: Pour la carte SIM de certains FAI (comme Verizon), la connexion à Internet peut prendre plus de temps. Veuillez attendre encore 2 à 5 minutes.

3. La page ci-dessous apparaîtra si votre carte SIM a besoin d'un code PIN pour se déverrouiller. Veuillez entrer votre code PIN et cliquez sur Enregistrer et appliquer, puis attendez 15 secondes pour vous connecter à Internet.

4. Ensuite, veuillez vérifier la carte d'informations cellulaires de la page d'état. Si le statut est connecté, signifie connecté à Internet avec succès.
