Using Instructions

Must Read Notices Before Using
Bluetooth technology is a close range wireless communication technology. The radiation of bluetooth earbuds is several dozen times less than smartphones, so the output power of bluetooth earbuds is fairly small, which will be interfered easily. If the earbuds disconnect sometimes during using, please consider and check the environment surrounding you as below:
1. Bluetooth technology adopts 2.4GHz ISM public opening frequency band, it will be interfered by WIFI easily, so it will cut out sometimes or constantly when you are in airport, train station, subway, office with many mates' phones or computers contacted by WIFI.
2. The output power of the true wireless earbuds is very tiny, so please keep the phone less than 10 meters from earbuds, and no obstacle between phone and earbuds.

3. When using the earbuds outdoor with open environment, you'd better keep your phone nearby you, because the signal of bluetooth spread out much widely outdoor than indoor.
4. Besides WIFI, the bluetooth connectivity also interfered by microwave oven, satellite antenna, power transformer, wireless telephone, wireless speaker, LCD display, human body block and so on.

Tips Before Using

1. Read the user manual carefully before using.
2. Fully charge the earbuds before the first time using.
3. Regularly charge earbuds and storage case monthly if you do not use them for a long time.
4. Only use charger and cable that are produced by formal manufacturer.
5. To get the best experience, please find the most suitable earcap size for yourself.

Trouble Shooting

Q: The earbuds' battery life can not last 12 hours?
A: After each fully charged, the earbuds can last around 3 hours for listing or talking on 80% volume, and the portable case with full power can fully charge the earbuds 3 times, so total will be around 12 hours using.

Q: If mobile phone can not find the earbuds' Bluetooth device sign, what should I do?
A: Firstly, please make sure you operate following the "How to Connect

Q: One side earbud is in higher volume than other side earbud, what should I do?
A: Firstly, turn off the earbuds and connect them to phone again. Secondly, if the first way does not work, please reset the earbuds.

Q: The earbuds are not charged when I put them into the charging case, what should I do?
A: If the front indicator lights of the charging box does not light up when you put the earbuds into the charging case; Firstly, make sure you put the earbuds in the right place, you can adjust the earbuds position properly server times; Secondly, check the power of the case, it need to be charged when there is no power of the case.

When need rest the earbud?
If the left and right earbud can not pairing automatically, please reset them.
If the left and right earbuds' audio is not synchronous, please reset them.
If one earbud volume is higher or lower than another one, please reset them.
If disorder happen to the earbuds, please rest them.

How to Rest the Earbuds
Put the Right earbud in charging case, one finger press the top edge of the earbud to keep the earbud in charging status (the indicator light is on red color or blue color means the earbud is in charging status), then use other finger double click the multifunctional button, the indicator light will flash in blue color for 5 times, next do the same way on the Left earbud. After this operation, the earbuds will recover to original status.

Warning of FCC

FCC STATEMENT :
This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions:
(1) This device may not cause harmful interference, and
(2) This device must accept any interference received, including interference that may cause undesired operation.
Warning: Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.
NOTE: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:
Reorient or relocate the receiving antenna.
Increase the separation between the equipment and receiver.
Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
Consult the dealer or an experienced radio/TV technician for help.
RF warning statement:
The device has been evaluated to meet general RF exposure requirement. The device can be used in portable exposure condition without restriction.
