To Whom It May Concern:

The antenna and the antenna connector on the Gateway will both utilize reverse-polarity SMA style connectorization. The specified antenna is the ANT-916-CW-RCS manufactured by Linx Technologies. It has a Peak gain of 3.3dBi and is identical in performance to the SMA version of the antenna used in the test. The antenna jack is the CONREVSMA002-L from Linx Technologies.

Sincerely,

A handwritten signature in black ink that reads "Todd Keaffaber".
