

2APU5-WPC200QI

Wireless Power Charger WPC200 Qi

Congratulations on your purchase of the Wireless Power Charger.

To ensure a long service life and optimum functionality of this product we recommend that you read this manual carefully.

Package Content

- Wireless Charger
- USB Cable
- User Manual

Specifications

Input: 5.0V/2A
Wireless Output: 5.0V/1.0A 5W
Charging Efficiency: ≤70%
Certification: Qi Certified

Instructions

- ① Insert into base
- ② Turn left 90°

-1-

Using the Micro USB cable supplied insert the Micro USB connector into the Micro USB port on the charger and then insert the other end of the cable into any charging port with a maximum approved power of 2A. Place your Qi compatible phone with inductive (wireless) charge feature onto the charger's Charge Plate (back of phone to charger) in either a horizontal or vertical position. The height of the Charge Plate may need to be adjusted to align the Charge Plate with your phone's charge area. Refer to your phone's user manual for its wireless charge area. Using the Height Adjustor button on the back of the charger, lower or raise the Charge Plate until your phone shows its charging in the normal way.

Note — only devices which support Qi wireless charge technology can be wirelessly charged from this charger, please check your device's specifications.

Caution, only connect the Charger to an approved charging device with a maximum approved power source of 5V/2A otherwise personal injury or device damage may occur. Use either the charge cable supplied with the charger or a certified cable. Do not drop, disassemble or modify this product. Do not expose this product to fire or excessive heat. Do not expose this product to water or excessive humidity. Do not put any bare metal on the surface area of the wireless charger when it is operating.

FCC Warning Statement

Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment. This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- - Reorient or relocate the receiving antenna.
- - Increase the separation between the equipment and receiver.
- - Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- - Consult the dealer or an experienced radio/TV technician for help.

RF Exposure: A distance of 15 cm shall be maintained between the antenna and users, and the transmitter may not be co-located with any other transmitter or antenna.
