Interface & Buttons

Main Interface

Volume Up/Volume Down:

Press the corresponding button to increase or decrease the volume of the tablet's audio playback.

Home:

Press to select/return to the main home screen.

Return:

Press to return to the previous screen.

Menu:

Press to open the main menu screen of apps, tools, and programs.

Settings:

Press to open the system settings menu.

Basic Operations

Main Menu

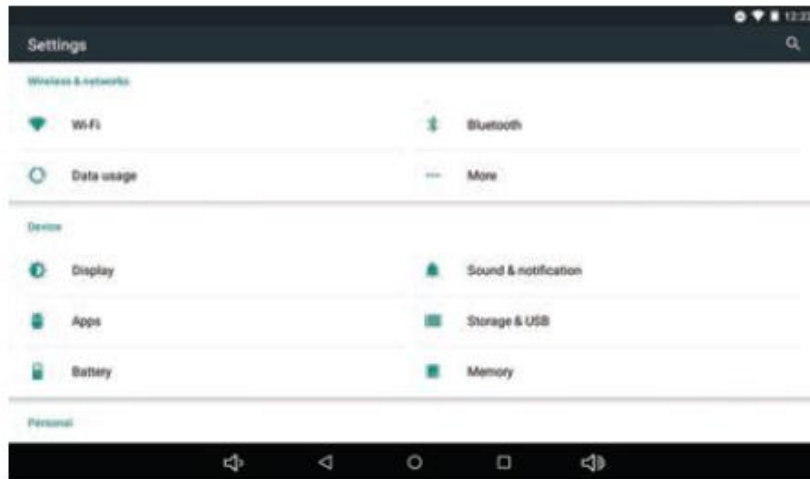

Press Menu  to open the main menu and access key features. This includes system settings, apps, music, video, web browsing, and games.

System settings

On the main menu, press Settings  to open system settings menu and make changes to the tablet, networks, personal preferences, and more.

Wi-Fi Setup

Select Wi-Fi under Wireless & Networks settings. Choose from the list of wireless routers in range and follow the setup instructions to connect to the network of your choice.

Running Applications

Install applications via Google Play, or by accessing the APK file. Run applications by selecting them on the main menu. Uninstall applications in Settings > Apps.

You can allow installation of apps from unknown sources in Settings > Security > Unknown Sources.

Backup & Reset

You can access data backup, reset, and similar functions in Settings > Backup & Reset.

Language & Input

You can access language, spell-check, voice activation, and other settings in Settings > Language & Input.

Video Playback

On the main menu, select Video Player. Select the file of your choice to view the file. Control keys include Play, Stop, Skip Forward, and Skip Backward.

Image Gallery

On the main menu, select **Gallery**. Select the **file** of your choice to view the image. Control keys include **Zoom**, **Narrow**, **Set**, and **Delete**.

The image features a red background with diagonal stripes. In the center, the word "EVOO" is written in a white, stylized, lowercase font. The letters are interconnected, with the 'E' and 'V' sharing a vertical stroke, and the 'O's being circular and overlapping.

FCC Statement

15.19

1. This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions:

- (1) This device may not cause harmful interference.
- (2) This device must accept any interference received, including interference that may cause undesired operation.

15.21

Note: The grantee is not responsible for any changes or modifications not expressly approved by the party responsible for compliance. Such modifications could void the user's authority to operate the equipment.

15.105(b)

NOTE: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation.

This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help

RF Exposure Statement

The SAR limit of USA (FCC) is 1.6 W/kg averaged over one gram of tissue. Device types Tablet PC (FCC ID:2APUQ-EV-A-101-1) has also been tested against this SAR limit. The highest SAR value reported under this standard during product certification when properly worn on the body is 0.500W/kg. This device was tested for typical body-worn operations with the back of the handset kept 0mm from the body. To maintain compliance with FCC RF exposure requirements, use accessories that maintain a 0mm separation distance between the user's body and the back of the handset. The use of belt clips, holsters and similar accessories should not contain metallic components in its assembly. The use of accessories that do not satisfy these requirements may not comply with FCC RF exposure requirements, and should be avoided.
