FCC COMPLIANCE STATEMENT:
This device complies with the FCC rules for Class B digital devices. Operation of this device is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference that may be received, including interference from unlicensed radio frequency devices.

This device has been tested and found to comply with the requirements under Part 15 of the FCC Rules, which apply to digital devices. This compliance does not guarantee that interference will not occur in all installations. If you experience interference, you may wish to consult the manufacturer's representative for assistance.

FCC Radiation Emission Statement
This device complies with the FCC's radio frequency interference requirements for Class B digital devices. Operation of this device is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference that may be received, including interference from unlicensed radio frequency devices.

F1 Read the user manual
Before using the washing machine, please read the user manual carefully to understand the correct operation and safety instructions. The user manual is included in the package and is also available on our website.

F2 Do not touch the drum
Do not touch the drum or any internal parts of the washing machine while it is running. The drum is very hot and can cause serious burns.

F3 Do not use harsh chemicals
Do not use harsh chemicals, such as bleach or strong detergents, as they can damage the washing machine's internal components.

F4 Do not overload the machine
Do not overload the washing machine with laundry, as this can affect the washing results and may damage the machine.

F5 Do not use the machine as a storage cabinet
Do not use the washing machine as a storage cabinet for clothes or other items. The machine is designed for washing laundry and should be used accordingly.

F6 Do not use the machine in a confined space
Do not use the washing machine in a confined space, such as a small room or a closet, as this can affect the machine's operation and may cause overheating.

F7 Do not use the machine in a wet area
Do not use the washing machine in a wet area, such as a bathroom or a kitchen, as this can cause water damage and may be a safety hazard.

F8 Do not use the machine in a high-temperature area
Do not use the washing machine in a high-temperature area, such as a room with a heater or a fireplace, as this can affect the machine's operation and may cause overheating.

F9 Do not use the machine in a noisy area
Do not use the washing machine in a noisy area, such as a room with a television or a radio, as this can affect the machine's operation and may cause overheating.

F10 Do not use the machine in a dusty area
Do not use the washing machine in a dusty area, as this can affect the machine's operation and may cause overheating.

F11 Do not use the machine in a humid area
Do not use the washing machine in a humid area, such as a room with a humidifier, as this can affect the machine's operation and may cause overheating.

F12 Do not use the machine in a low-ventilation area
Do not use the washing machine in a low-ventilation area, as this can affect the machine's operation and may cause overheating.

F13 Do not use the machine in a high-altitude area
Do not use the washing machine in a high-altitude area, as this can affect the machine's operation and may cause overheating.

F14 Do not use the machine in a low-pressure area
Do not use the washing machine in a low-pressure area, as this can affect the machine's operation and may cause overheating.

F15 Do not use the machine in a high-pressure area
Do not use the washing machine in a high-pressure area, as this can affect the machine's operation and may cause overheating.

F16 Do not use the machine in a low-temperature area
Do not use the washing machine in a low-temperature area, as this can affect the machine's operation and may cause overheating.

F17 Do not use the machine in a high-temperature area
Do not use the washing machine in a high-temperature area, as this can affect the machine's operation and may cause overheating.

F18 Do not use the machine in a low-temperature area
Do not use the washing machine in a low-temperature area, as this can affect the machine's operation and may cause overheating.

F19 Do not use the machine in a high-pressure area
Do not use the washing machine in a high-pressure area, as this can affect the machine's operation and may cause overheating.

F20 Do not use the machine in a low-pressure area
Do not use the washing machine in a low-pressure area, as this can affect the machine's operation and may cause overheating.

F21 Do not use the machine in a high-altitude area
Do not use the washing machine in a high-altitude area, as this can affect the machine's operation and may cause overheating.

F22 Do not use the machine in a low-altitude area
Do not use the washing machine in a low-altitude area, as this can affect the machine's operation and may cause overheating.

F23 Do not use the machine in a high-temperature area
Do not use the washing machine in a high-temperature area, as this can affect the machine's operation and may cause overheating.

F24 Do not use the machine in a low-temperature area
Do not use the washing machine in a low-temperature area, as this can affect the machine's operation and may cause overheating.

F25 Do not use the machine in a high-pressure area
Do not use the washing machine in a high-pressure area, as this can affect the machine's operation and may cause overheating.

F26 Do not use the machine in a low-pressure area
Do not use the washing machine in a low-pressure area, as this can affect the machine's operation and may cause overheating.

F27 Do not use the machine in a high-temperature area
Do not use the washing machine in a high-temperature area, as this can affect the machine's operation and may cause overheating.

F28 Do not use the machine in a low-temperature area
Do not use the washing machine in a low-temperature area, as this can affect the machine's operation and may cause overheating.

F29 Do not use the machine in a high-pressure area
Do not use the washing machine in a high-pressure area, as this can affect the machine's operation and may cause overheating.

F30 Do not use the machine in a low-pressure area
Do not use the washing machine in a low-pressure area, as this can affect the machine's operation and may cause overheating.

F31 Do not use the machine in a high-temperature area
Do not use the washing machine in a high-temperature area, as this can affect the machine's operation and may cause overheating.

F32 Do not use the machine in a low-temperature area
Do not use the washing machine in a low-temperature area, as this can affect the machine's operation and may cause overheating.

F33 Do not use the machine in a high-pressure area
Do not use the washing machine in a high-pressure area, as this can affect the machine's operation and may cause overheating.

F34 Do not use the machine in a low-pressure area
Do not use the washing machine in a low-pressure area, as this can affect the machine's operation and may cause overheating.

F35 Do not use the machine in a high-temperature area
Do not use the washing machine in a high-temperature area, as this can affect the machine's operation and may cause overheating.

F36 Do not use the machine in a low-temperature area
Do not use the washing machine in a low-temperature area, as this can affect the machine's operation and may cause overheating.

F37 Do not use the machine in a high-pressure area
Do not use the washing machine in a high-pressure area, as this can affect the machine's operation and may cause overheating.

F38 Do not use the machine in a low-pressure area
Do not use the washing machine in a low-pressure area, as this can affect the machine's operation and may cause overheating.

F39 Do not use the machine in a high-temperature area
Do not use the washing machine in a high-temperature area, as this can affect the machine's operation and may cause overheating.

F40 Do not use the machine in a low-temperature area
Do not use the washing machine in a low-temperature area, as this can affect the machine's operation and may cause overheating.

Safety and Attention

⚠ Attention
Please read the user manual carefully before using the washing machine. The user manual contains important safety information and instructions for use.

⚠ Attention
Do not touch the drum or any internal parts of the washing machine while it is running. The drum is very hot and can cause serious burns.

⚠ Attention
Do not use harsh chemicals, such as bleach or strong detergents, as they can damage the washing machine's internal components.

⚠ Attention
Do not overload the washing machine with laundry, as this can affect the washing results and may damage the machine.
