Compatibility

This wireless charger could provide power supply for devices with built-in wireless charging receiver.
(It is suitable for wireless charging devices that support Qi2.0 module)

15W Wireless Charger Using Instructions

- 1 Insert cable USB-C into the PD20W adapter , and then plug the adapter into the power outlet. USB-C cable made of PVC 3ft /0.915m.

- 2 Place your phone on the wireless charger. Make sure that the phone is well located at the charging area of wireless charger. When the phone is being charged, the phone's screen will display the charging icon.

Attention:

1. Please keep the charger away from water or other liquid.
2. If you need to clean the charger, please make sure it is not connected power supply.
3. Using Environment temperature remains 0 -25 C .
4. Do not place any foreign objects between your device and the wireless charger's surface, including metal pads on a car mount, magnetic cards, door keys, coins, NFC cards or other metal objects, as they could potentially demagnetize the wireless charger, affect the charging speed, or cause overheating.

FCC compliance statement

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions:

- (1) This device may not cause harmful interference, and
- (2) This device must accept any interference received, including interference that may cause undesired operation.

Changes or modifications not expressly approved by the party responsible for compliance could void the users authority to operate the equipment.

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.
