Subject: 5G Sub-6GHz HAC Attestation
FCC ID: 2APXW-CELERO5G

To Whom It May Concern,

We attest the handset as designed is expected to exhibit similar audio intensity levels between a voice call placed over a VoLTE connection and over a 5 G Sub- 6 GHz connection. The combination of ABM1 values from a VoLTE connection and ABM2 values from the $5 \mathrm{G} \mathrm{Sub}-6 \mathrm{GHz}$ connection, while maintaining a $\mathrm{S}+\mathrm{N} / \mathrm{N}$ margin of 3 dB or greater from the rating threshold, is expected to represent the HAC performance when operating in $5 \mathrm{G} \mathrm{Sub-6GHz}$ bands.

Should you have any questions or comments concerning the above, please contact the undersigned.

Yours Sincerely,

## _Ru:Sha
