About The Manual

The Humly Room Display User; s Manual provides instructions to follow when setting up a new HRD device. This document is intended to compliment the training and expertise of qualified personnel, not to replace it.

For any questions that might arise, please visit: https://www.humly.com

Intended Use

The intended use of the Humly Room Display is to allow the meeting participants inside a room to remain uninterrupted from the outside. As someone looking for a meeting you can visually see if a room is unavailable, when it will be available again and simply booking it on the spot - without having to knock on the door.

Read the safety instructions thoroughly before powering up the device or starting any servicing of the humly solution. Keep this document for later use.

Parts list

Parts included in the giftbox:

- Humly Room Display
- Wall mount for Humly Room Display

Added upon on request:

- Wall mount template
- Power supply unit (for non-PoE installations)

Safety Instructions

Read these safety instructions before you use the product. This Unit complies with all the relevant safety requirements for IT equipment. It should not be used or stored in a location where the surrounding temperature is higher than 40¢C or below 10¢C.

Keep these safety instructions and other documentation for future use.

WARNING! Correct assembly, fitting and installation is of the utmost importance. This is not covered by Humly AB_is undertakings. Incorrect fitting and/or installation may result in personal injury or loss. Humly AB disclaims all liability, of whatever kind, if the product is assembled, fitted and/or installed in an incorrect manner. For safety reasons, no screws for attachment to walls are included since the characteristics of walls and their load-bearing capacity may vary. The assistance of a specialist or dealer may be required, if necessary, for appropriate fixtures for the wall concerned.

WARNING! Opening or removing covers and servicing of the product may only be carried out by an authorized specialist. Unauthorized opening and unprofessional repair operations may result in serious risks for the user (risk of electrical shocks, fire hazards and other electrical risks).

WARNING! Do not use the product if the outer casing is damaged.

WARNING! Do not use defective/damaged cables. A defective cable may result in electrical shocks or fire hazards.

WARNING! The product run on 48V Power over Ethernet (PoE) PD Classification 0, providing the PoE is compliant with IEC60950-1 Clause 2.5 Limited Power Sources (LPS). The product can also be powered by a 12V power adapter (sold separately). Adapter should not be connected at the same time as PoE.

WARNING! The product and/or the DC adapter must not be covered when it is in operation.

WARNING! Do not insert any foreign object into the product.

WARNING! In emergencies (e.g. damaged casing or cables, penetration of liquid or foreign matter), remove the DC connector and/or the POE cable immediately.

WARNING! The product may only be used in an indoor environment.

WARNING! Clean with a damp cloth and do not use any detergent, alcohol or other chemical on any surface of the device.

WARNING! Humly AB disclaims all liabilities, of any kind, if the product is used in a manner other than that specified in the user manual.

Mounting instructions

Standard walls

IMPORTANT! Read the safety instructions carefully before using the mounting instructions.

- 1. Unmount the back plate of the device, by carefully turning it counter clockwise. Use a spirit level to adjust it horizontally. Height from floor to center of device approximately 1500 mm / 5 ft.
- 2. Use the holes in the back plate to mark out hole positions on the wall.
- 3. Decide on the direction you want to exit the cables and make sure the hole for the cable exit is facing this direction.

Note! If you plan to route cables into the wall using the big open area in the middle of the back plate we recommend facing the cable hole either up or down, not sideways.

 Make sure that the markings are exactly leveled and drill the holes for the mounting bracket. Mount the back plate to the wall with the screws and route the cables through the appropriate cable channels on the device.

Note! Use 2 ; 4 screws depending on the structural capacity of the wall. Always drill holes and use suitable plugs for wall types such as concrete, plaster etc. Choose a screw type that is suitable for the type of plug and wall concerned. Use screws with a diameter of 4 ; 5 mm / gauge # 7 - 10 and minimum length of 35 mm / 1- 3 /8;. If uncertain always contact a specialist or dealer for assistance with wall mounting.

Note! Do not remove the protective film on the back of the mounting bracket. The ¡sticky surface; should only be used for glass wall mounting.

5. Mount the device on the bracket by fitting the talons on the back plate with the holes in the device and gently turn it clockwise to snap it in place. Secure it with the safety screw.

Glass walls

IMPORTANT! Read the safety instructions carefully before using the mounting instructions. For mounting on smooth glass surfaces only! Make sure the surfaces are clean, dry and above 15¢C / 59¢F before mounting! Avoid mounting in direct sunlight!

- Start by cleaning glass wall surface with alcohol and let the surface be completely dry. Recommended room temperature during this operation min 15¢C / 59¢F. Apply a horizontal adjusted tape on the glass wall as a guide for the adhesive foil. Height from floor to center of device approximately 1500 mm / 5 ft.
- 2. Remove the protective film partly from the glass wall adhesive foil.
- 3. Press the foil on to the glass wall with a force of approximately 3 kgf. Use a rubber roller or scraper for this operation. Make sure to remove any trapped air bubbles.
- 4. Remove protective film from the back plate.
- 5. Use guides on foil to make sure bracket is in line with glass wall sticker. Decide on the direction you want to exit the cables and make sure the hole for the cable exit is facing this direction.

Note! The glue will bond immediately, and cannot be remounted.

- 6. Press mounting bracket into glass wall foil for 20 seconds by a force of approximately 6 kgf. Leave bracket on glass wall for 20 min before final assembly.
- 7. Route the cables through the appropriate cable channels on the device.
- 8. Mount the device on the bracket by fitting the talons on the back plate with the holes in the device and gently turn it clockwise to snap it in place. Secure it with the safety screw.

Technical Specifications

Visual interface

- 8 inch capacitive touch with anti-fingerprint treatment.
- 48 LED RGB light aura and indication light.

Connectivity

- Wifi 802.11 a/b/g/n*
- Ethernet RJ-45, 10/100/1000 Mbit, PoE & PoE+(IEEE 802.3af)
- NFC/RFID 13.56 Mhz (ISO/IEC 14443A/B), MIFARE 4K/1K
- Bluetooth 5.0

Power

• Power over Ethernet (PoE), or 12V AC/DC power adapter

Compatible Platforms

- Microsoft Office 365
- Microsoft Exchange 2019
- Microsoft Exchange 2016
- Microsoft Exchange 2013
- Microsoft Exchange 2010
- Google G Suite
- IBM/Lotus Domino Smartcloud
- IBM/Lotus Domino 8.5.3 ; 9.x

User Interface Languages

 Arabic - Catalan - Chinese (simplified) - Chinese (traditional) - Czech - Danish - Dutch - English -Estonian - Finnish - French - Galician - German - Italian - Japanese - Latvian - Lithuanian -Norwegian - Polish - Portuguese - Russian - Spanish - Swedish.

API & Other

- Open API for third party integration
- Communication via real-time two-way connection
- Remote management with multi-site support
- Real-time monitoring & statistics

Size and Weight

- Size (WxHxD):
 - \circ $\;$ With wall mount: 183 x 157 x 28.7 mm $\;$
 - Without wall mount: 183 x 157 x 25.6 mm
- Weight: 650 grams (22.9 ounces)

Approved By:

Architecture Overview

- The Humly Server communicates with Humly Room Displays via HTTPS over a configurable port (default 3002).
- The Humly Control Panel web application communicates with the Humly Server using configurable HTTP port during initial setup to configure SSL certificates. After SSL has been configured all communication uses HTTPS on the port configured during initial setup (default port 3002).
- The Humly Home server communicates with the booking system via either HTTP (80) or HTTPS (443)
- The system uses configurable NTP servers using UDP over port 123 to synchronize time and date.
- The system will connect to Humly Cloud using HTTPS over port 443 to validate and renew licenses and provide maintenance services like updates and error logging.
- Other devices and integrations can be allowed to communicate with the Humly Server over HTTPS using the same port that has been configured for the Humly (default 3002).

n

Getting Started

Initial Boot & Network Configuration

HRD can be mounted to both standard walls and glass walls. Mounting kits for both are included in the box and the cable can be routed to any of the four sides or into the wall. The wall mount has a bayonet mount to snap on the unit, which also can be secured with a screw.

HRD can be connected via either a wired Ethernet connection or Wifi using a dynamic or static IP. Once the device boots up, the logo should appear during the initial OS boot, then the configuration options will follow

Based on your network setup, you can select between Ethernet or Wifi configuration

Humly Room Display - User Guide

Status LED Colors

The Humly Room Display has three status led colors which user can use to recognize the room availability

• Green: The room is free for more than 10 minutes.

• Yellow: A meeting is about to start soon, in less than 10 minutes, and or, the room needs to be checked in.

Approved By:

• Red: The room is busy.

Approved By:

Main screen

From the main screen you can see details about the meeting room, and you can perform the following actions:

- Book instant meeting
- Book future meeting
- Extend ongoing meeting
- End ongoing meeting

Some of the above functions can be disabled or secured based on user PIN or RFID for each room from the Humly Control Panel.

Check-in

The check in function is a way to enhance meeting room utilization by freeing up the rooms where no one shows up for the booking.

This function can be enabled and customized from the Humly Control Panel, if enabled, a check-in button will appear 10 minutes before the meetings start and remain until 5-30 minutes after the meetings start depending on the settings in Humly Control Panel.

Humly Room Display - User Manual

Revision - B

n

Approved By:

If a user checked in the meeting, a confirmation message will appear on the device.

If no check-in is made on the screen during the check-in time frame, the meeting will be ended short to free up the meeting room for others to use.

Calendar screen

The calendar screen can be accessed from the main screen by pressing the calendar icon.

n

From the calendar view, you can see the room schedule, you can also book meeting by pressing Book button on available slot, you can extend a meeting or delete scheduled meeting.

The schedule view and the available actions may vary based on the room settings in Humly Control Panel.

| 14:28 pm \mathcal{O} 12 $\underline{\wedge}$ Equipment issue | \$ E \$ |

| Booked 15:30 - 16:30 Demo Meeting - Johan Svensson | Check in |
| Available rest of the day Until Tomorrow at 9:00 am | Book |
| Close | |

Room Finder

The room finder is a tool to find an available room based on specific filters, like room availability, location, size and equipment.

You can use this function to book instant meeting and future meetings for another room which match the applied filters.

Room finder can be accessed by pressing the search icon in the top left corner from the main view.

Then you can apply your search filters based on the locations, equipments and room size.

Report room equipment

Reporting room equipment from Humly Room Display is a feature for notifying the responsible person about a broken or malfunctioning equipment in the meeting room by sending automatic email, and signaling other users about the issues in this meeting room.

You can access the report equipment screen by pressing the icon in the top right corner.

To submit a report, highlight the equipment icons and then press "Report"

27

n

Approved By:

A confirmation message will appear after successful report, and triangle notification in upper left corner of the HRD.

You can at anytime report the same equipment as Repaired the same way of reporting broken

Administration menu

To access the administrator panel, press the icon in the top right part from the main screen or any screen

This will prompt you to authenticate as an administrator using PIN or RFID

Once authenticated, the administrator panel will be shown, from the panel you can perform the below actions

Approved By:

Copy logs to USB

For troubleshooting and support, you might need to copy the device logs, in this case, insert USB formatted as FAT 32 and press Copy logs to USB button.

Update via USB

To update the HRD device firmware, you can copy the firmware upgrade file into USB stick, plug it into the device and press upgrade.

For more details about firmware reset & upgrade. Refer to Firmware Upgrade section in the support portal

Reboot Now

Reboots the HRD

n

Approved By:

Network

Opens the network configuration menu where the two network interfaces Ethernet and Wifi) can be configured.

Change Room

You can point the HRD to use another room configured on the same Humly Control Panel server.

Server IP

The HRD can be disconnected from a Humly Control Panel Server and connect into another server.

Diagnostic

Opens a diagnostics menu which allows for test of the LEDs, the touch panel, network connection and some other basic functional tests.

Regulatory and Certification

FCC

FCC ID: 2APYB- HUM1001

FEDERAL COMMUNICATIONS COMMISSION INTERFERENCE STATEMENT

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures: -Reorient or relocate the receiving antenna.

-Increase the separation between the equipment and receiver.

-Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.

-Consult the dealer or an experienced radio/ TV technician for help.

CAUTION:

Any changes or modifications not expressly approved by the grantee of this device could void the user's authority to operate the equipment.

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions:

(1) this device may not cause harmful interference, and

(2) this device must accept any interference received, including interference that may cause undesired operation

RF exposure warning

This equipment must be installed and operated in accordance with provided instructions and the antenna(s) used for this transmitter must be installed to provide a separation distance of at least 20 cm from all persons and must not be co-located or operating in conjunction with any other antenna or transmitter. End-users and installers must be provide with antenna installation instructions and transmitter operating conditions for satisfying RF exposure compliance.
