Subject: Request for Class II Permissive Change

To whom it may concern,

The intent of this letter is request a Class II Permissive Change to the module having FCC ID: 2APYM-OPK1.

The module was previously certified with a SAR Test Exclusion threshold at the distance declared in the original application. This application is to add a specific design implementation for Opkix, Inc which uses the module in a portable application with no required minimum separation, by adding SAR data for this specific case. The host application is described as the OPKIXONE.

No changes have been made to any radio characteristics, including the power settings and tune up procedure from the original filing.

Sincerely,

A handwritten signature in blue ink, appearing to read "Urson Russell".

Urson Russell
Chief Operations Officer
C: 714-417-6875
