

Q103

Desktop tray with wireless charger

Please read the user manual before using Q103 wireless charger

Please read the instruction manual before operating the wireless charger Q103

Qi CE FCC ROHS

Product Illustration

Packaging includes: 1 * USB Charging Cable
1 * Wireless Charging Mat

Product Parameters

- ◇ Input: DC 5V/2A (DC 9V/1.67A)
- ◇ Output: DC 5V/1A (DC 9V/1.12A)
- ◇ Compatible Standards: CE, ROHS, FCC ID, Qi
- ◇ Charging Efficiency: 80%
- ◇ Frequency Response: 116.32-193.78KHz
- ◇ Without Built-in Battery
- ◇ Charging Distance: 3-8mm
- ◇ Power: 15W/10W/7.5W/5W
- ◇ Foreign Object Detection Function

Operation Instruction

Operational Instruction

- ◇ Connect this product to a power supply with the included Micro USB charging cable. The red indicator light indicates that the product is in standby state.
- ◇ Place your mobile device in the center of the product's charging area. The blue indicator light blinks to indicate that the product is wirelessly charging your device.
- a) Note: If the indicator light of this product flashes red and blue, it means that the foreign object detection function is activated, please remove any other items that may interfere with charging, and relocate your device to the product charging area.
- b) Frequently Asked Questions: Not all mobile devices support wireless charging. Please refer to the instructions of your device or search online to ensure that your device supports the wireless charging function.
- c) This product has no built-in battery, so it must be connected to a power source to wirelessly charge other mobile devices. The protective case of the mobile phone will affect the normal wireless charging efficiency of this product. Please try to avoid the protective cover of the mobile phone from exceeding 1.5mm thickness. Please use a USB 3.0 fast charge protocol power 9V adapter with an output

of 2 amps or more to ensure the best performance of this product with 10W power. If you are using an ordinary 5V power adapter, it can only charge 5W power. If it is powered by a computer port, please know that the maximum output current of the USB 2.0 port is 0.5 amps and the maximum output current of the USB 3.0 port is 0.9 amps; therefore, the computer cannot power the device normally.

Safety Informations

Please read the safety instructions to preventing from any dangerous situations when using the product.

- ◇ Please do not frequently fall or bump the device, which may cause the explosion.
- ◇ Please do not use the product in low temperature and humid environment, the normal operational environment is 0-50°C.
- ◇ Please do not personally disassemble and repair the product.
- ◇ Please do not place the magnetic cards with the product to prevent from demagnetization.
- ◇ Please do not place the product with medical equipment in 20 cm to prevent device interference.
- ◇ Before using this product to charge your other devices, please remove the metal ornaments on the contact surface of the charged device and this product.
- ◇ When not in use, please unplug the product charger from the socket to avoid consuming the life of the wireless charger or causing damage.

FCC Warning

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference. (2) This device must accept any interference received, including interference that may cause undesired operation. Any Changes or modifications not

expressly approved by the party responsible for compliance could void the user's authority to operate the equipment. This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help. The device has been evaluated to meet general RF exposure requirement.

This equipment complies with FCC radiation exposure limits set forth for an uncontrolled environment. This equipment should be installed and operated with minimum distance 20cm between the radiator & your body.
