

IMPORTANT TIPS FOR OPERATION & SAFETY

Be sure to read all safety precautions and warnings below before attempting to use your Wireless Charging LED Desk Lamp. Violation of these instructions could result in the device malfunctioning, injury to the user and/or violation of the tzumi Product Warranty.

- This unit is intended for indoor use only. Do not use the lamp in damp environments or place where the unit is likely to get wet. Avoid placing near hot or flammable objects or exposing the lamp to direct sunlight.
- Wipe with a microfiber cloth to clean. Do not use solvents, abrasives, or aerosol cleaners, as these could damage the unit.
- If you do not plan to use your lamp for extended periods of time, disconnect the power adapter from the power source and store until you're ready to use again.
- Your lamp should be set on a flat surface, never on a slope.
- Do not attempt to use multi-function adapter plugs with your lamp.
- While in use, make sure that the power cable is straight and free from kinks and knots. If the power cord is damaged, contact the Customer Service team for a replacement.
- Do not insert metal or combustible materials into the cracks of the lamp. Never touch electronics with wet hands.
- Do not shake the lamp head or base for any reason. Avoid forcing the lamp into place or using too much pressure when adjusting into your desired position.
- This lamp belongs to the III class, meaning that it is compatible with DC5.4V/2.8A power only. Do not use a power source that exceeds this range. Doing so may permanently damage the unit.
- When the LED bulb no longer works, the lamp should be replaced. Do not attempt to replace the LED yourself.
- Do not attempt to disassemble any lamp parts or perform maintenance on the lamp yourself. This violates the Tzumi Warranty and may cause injury to the user. Instead, please contact the Tzumi Customer Service team at Tzumi.com/Support.

WIRELESS CHARGING LED DESK LAMP

User Manual Text

INTRODUCTION

Add a subtle touch of ambiance and elegance to any space with the tzumi Wireless Charging LED Desk Lamp. With a sleek and sophisticated folding frame, this energy-efficient lamp can charge any Qi-compatible device and save you from tangled cables, making a cleaner workspace and charging station. Its modern and lightweight design also makes for easy travel and storage. Touch sensor buttons offer dimmable brightness at the tap of a finger. Brighten any space with a touch of convenient, high-tech luxury.

Note: Please be sure to read this user manual in its entirety before using your new wireless charging lamp.

PRODUCT OVERVIEW

PACKAGE CONTENTS

- Wireless Charging LED Lamp
- User Manual
- DC - USB Charging Cable
- * Wall Adapter NOT included.

PRODUCT SPECIFICATIONS

Input: DC5.4V/2.8A
Operating Voltage: DC5.4V
Maximum Power: 4W
Lamp Class: III
LED Color Temperature: 5000K

POSITIONING YOUR LAMP

Your lamp features an adjustable head, which can adapt to multiple angles. The arm connecting the lamp's head and base also features articulating joints, which allow it to bend and fold in positions up to 90°.

USING YOUR LAMP FOR THE FIRST TIME

The first time you use your Wireless Charging LED Desk Lamp, connect the DC plug to the DC socket (power source) on the lamp's base and connect the power adapter to a power source (such as a wall socket or computer).

Once the adapter has been connected, tap the Power Button to turn the lamp ON or OFF, and press either the ⊖ button or ⊕ button to raise or dim the lamp's brightness respectively.

TOUCH SENSOR BUTTONS

- ⊕: Tap this button to turn the lamp ON or OFF. When the unit is OFF, no other buttons will work.
- ⊕: Tap this button and hold for 1-2 seconds to gradually increase the LED brightness.
- ⊖: Tap this button and hold for 1-2 seconds to gradually dim/ decrease the LED brightness.

CHARGING YOUR DEVICES

1. Once your lamp is connected to a power source, the lamp is ready to charge a device. The charging surface will remain active even if the lamp is off.
2. Simply place your Qi-enabled smart device on the wireless charging surface on the lamp's base. The device will begin to charge automatically.
3. The LED indicator light will illuminate and glow BLUE while the phone is charging and will turn off when the device is removed.

Note: ¹⁾ The lamp works best when plugged into a 2.8A Wall Charger. ²⁾ Charging speeds may be affected by the location(s) of your phone's Qi Standard induction coil(s) and the power source. The wireless charger cannot be used to power devices with metallic cases or cases thicker than 3mm.

TROUBLESHOOTING

	POSSIBLE CAUSES	RECOMMENDED SOLUTIONS
The lamp is either flashing or will not illuminate at all.	There is no power coming from the power source/outlet.	Check the power source and make sure all parts are plugged properly.
	The LED is not properly connected/installed.	Check the LED for connection. If you see or hear loose parts, contact Customer Service.
	There is an unstable connection between the DC plug and socket.	Check whether the DC plug and DC socket are connected. Unplug and re-plug if necessary.
If the problem persists after attempting the solutions listed above, contact our Customer Service team at tzumi.com/Support . Do not attempt to fix the lamp yourself.		

FCC STATEMENT :

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions:

- (1) This device may not cause harmful interference, and
- (2) This device must accept any interference received, including interference that may cause undesired operation.

Warning: Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

NOTE: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.

- Increase the separation between the equipment and receiver.

- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.

- Consult the dealer or an experienced radio/TV technician for help.

FCC Radiation Exposure Statement:

This equipment complies with FCC radiation exposure limits set forth for an uncontrolled environment. This equipment should be installed and operated with minimum distance 20cm between the radiator & your body.
