

Hon Lin Technology Co., Ltd.

11F, No.32, Jihu Rd., Neihu Dist., Taipei City 114,
Taiwan R.O.C.

Date: September 14, 2020

Attestation

FCC ID: 2AQ68T99W175M

To Whom It May Concern:

This application is intended to reuse previous test data (from FCC ID: 2AQ68T99W175, certified on 05/07/2020 of initial application and 06/04/2020 of C2PC application), due to the fact that the two versions of products are hardware-wise identical and only the following changes have been made:

1. Adding 5G NR mmWave components but not enable.

Since the 5G NR mmWave components no big impact on the emission is expected. So, we have performed spot checks on the following items to verify that if any unexpected RF conducted power or emission changes can be noted. The test results show that all spot check data are within the instrument measurement uncertainty and data reuse is justifiable.

Verification test items with 1 samples:

- Conducted Power and ERP/EIRP full test on all modulations and channels
- Radiated Emission Test (choose worse case)

For the test result, please refers to included exhibit "Test Reports.pdf" for detail.

Reuse data test items (Part 22/24/27/90/96)

- Conducted Power / EIRP / ERP / PAPR / OBW / Modulation characteristics / Frequency stability
- Radiated Emission / Conducted emission / Band edge
- SAS protocol (Part 96.47 End user device additional requirements), the software remain the same.

Hon Lin Technology Co., Ltd.

Taiwan R.O.C.

Date: September 14, 2020

Also, both the referenced application and this new application are all subject to the same FCC rule and there is no new rule update for related rules.

Accordingly, we believe that the reuse data from previous certified filing is justifiable. Thank you for your attention and please feel free to contact us, if you should have any questions.

Sincerely yours,
