2   A111 Label Declaration

The size of the A111 package is 5.2 x 5.5 x 0.88 mm and thus FCC ID and ISED label not possible to be placed on the module.

Note that the A111 package includes A111 marking information and thus not possible to add FCC ID and ISED labelling information due to the small form factor. See figure 1.

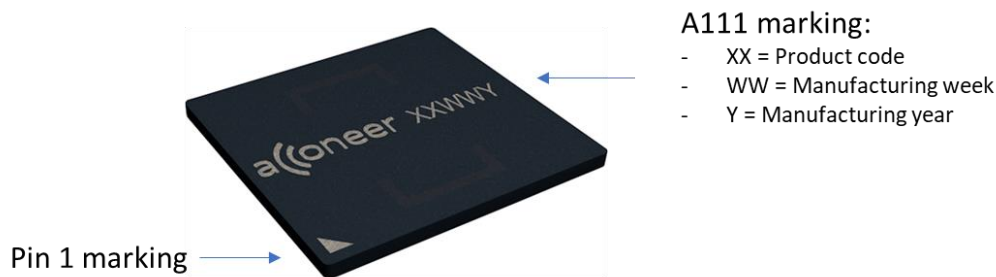

Figure 1, Acconeer A111 marking

FCC ID and IC is placed in the **A111 User Manual** (chapter 9), see separate document.

FCC ID and IC is also placed on the device packaging, see following picture of the packaging artwork with correct markings:
