Declaration Letter

Our Company (DTEN Inc)

The test cases:

Product: DTEN ME

Model: DBA0027

The trademark: DTEN

The WIFI / BT (ESP32-S) module on the motherboard is not tested

Now the statement is as follows:

In the early stage of R & D, the wireless function of this mo

dule was considered, but in the later stage, various functions were

considered, and the function of the wireless part of this module wa

s abandoned, and it was used as an MCU. Therefore, this test did

not test the wireless part of this module.

The software has shielded the wireless function of the modul

e, and promised that the product will not use the wireless function

of the module later!
