

## Product Operation Guide

- a) Power on: Short press to turn on. The blue light flashes after power on, then the Bluetooth broadcasts and the product starts working.
- b) Bluetooth broadcast: After power on, the device broadcasts “Tackobox” once every second until the connection is successful or the device is shut down.
- c) Bluetooth connection: the blue light stays on after the connection, the product and the smart device perform data interaction;
- d) Setting for the alarm sensitivity and values: After successfully connecting to the APP, the user can set the sensitivity and corresponding value of the alarm on the APP.
- e) Alarm starts: When the detected vibration exceeds the set sensitivity, the alarm will be triggered and the red indicator light flashes. The alarm command will be reported once when the Bluetooth is connected. After the alarm stops, it takes 3 seconds to be triggered again.
- f) Alarm stops: The alarm will automatically stop in 4 seconds after it starts, and the red LED will be turned off; a stop alarm command will be reported if the Bluetooth is connected.
- g) Shutdown: long press for 2 seconds to shut down; it will be automatically shut down if there is no alarm trigger in one hour; or continuous shaking for 8 seconds to shut it down;
- h) Charging: Charging with the micro usb cable, starts with green light on, and completes with green light off.

### **FCC Requirement :**

Changes or modifications not expressly approved by the party responsible for compliance could void the user’ s authority to operate the equipment.

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two

conditions:

- (1) this device may not cause harmful interference, and
- (2) this device must accept any interference received, including interference that may cause undesired operation.

### **FCC 20cm Statement:**

This equipment complies with FCC radiation exposure limits set forth for an uncontrolled environment. This equipment should be installed and operated with a minimum distance of 20cm between the radiator & your body. This transmitter must not be co-located or operating in conjunction with any other antenna or transmitter.

**Note:** This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses, and can radiate radio frequency energy, and if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.

V-Mark Enterprises Ltd.  
Add: 400-601 West Broadway, Vancouver, British Columbia,  
Canada

- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.
