

# DinoFire® Wireless Presenter User Manual

## DR100

Be sure to carefully read this user manual before using the wireless presenter and keep it for future reference.

### WARNING: RISK OF INJURY!

Users should always keep power switch, the main energy saving design, when the product is not in use. Never decide on independent power switch design, but prevent the product design to be lit.

Use power switch, however for independent power switch.

Use power design, mini USB receiver can be easily inserted in wireless demonstrator kit, easy to carry plug and play.

7. Press the Power button to turn on/off the device.

#### 3.3. The operation of Android when using the presenter

1. Press the Home button to return to the first slide.
2. Press the Previous button to go to the previous slide.
3. Press the Next button to go to the next slide.
4. Press the Stop button to stop the presentation.
5. Press the Back button to go to the previous slide.
6. Press the Forward button to go to the next slide.
7. Press the Power button to turn on/off the device.

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) this device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

Any changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

NOTE: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation.

If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

The device has been evaluated to meet general RF exposure requirement. The device can be used in portable exposure condition without restriction.
