

Attn: Director of Certification

Cover letter regarding Class II Permissive Change application for FCC ID: 2AQ9D-P0000457

The purpose of this filing is to apply for a Class II Permissive Change (C2PC) for a Limited Module to be integrated into a host Medical Cart. The FCC ID for the module is 2AQ9D-P0000457 and the original grant date is 08 December 2020.

Below is an explanation of how the limitations of the LMA are overcome with the module installed in the host product:

- The LMA has no shielding on the RF circuitry. However, shielding is provided by the host product. Also, a report is included with this filing which shows compliance of the final product with the applicable limits for radiated spurious emissions.
- The antenna for the LMA is not permanently attached or having unique connectors. However, the host Medical Cart is also manufactured by the applicant and the antenna is not accessible on the outside of the final product. Enovate Medical, LLC will have complete control of the process of installing the LMA into the host product.
- There is no label on the limited module. However, the host contains a label visible on the outside of the product which lists the FCC ID of the LMA.

Your efforts in reviewing this application are greatly appreciated. Please contact me if there are questions or additional information needed concerning this request.

Sincerely,

Martin Taylor
