

Subject : Explaining that the RF segment is designed not to be opened easily by users.

Dear Sir,

We, TRIANGKECNC Corp., Ltd., located at Building B-720, Kumkang Penterium ITtower, 282 Hagui-ro, Dongan-gu, Anyang-si, Gyeonggi-do, Korea, as application for the product TGBS900BA would like to explain that the RF segment is designed not to be opened easily by users.

Special shielding cover composed by SUS case and Lock device is used for the structure of difficulty to open the casing so that user cannot reach to RF part easily.

Please refer to below image.

Also, Special connector that has counterclockwise, is used for antenna and module output port.

Please refer to below image.

Although connector is standard N type, it has counterclockwise so users cannot easily change antenna from the device (TGBS900BA)

Sincerely Yours,

Koo, Jeong Min
CEO / TRIANGLECNC Corp., Ltd.

Handwritten signature in blue ink, appearing to read 'JM Koo'.
