

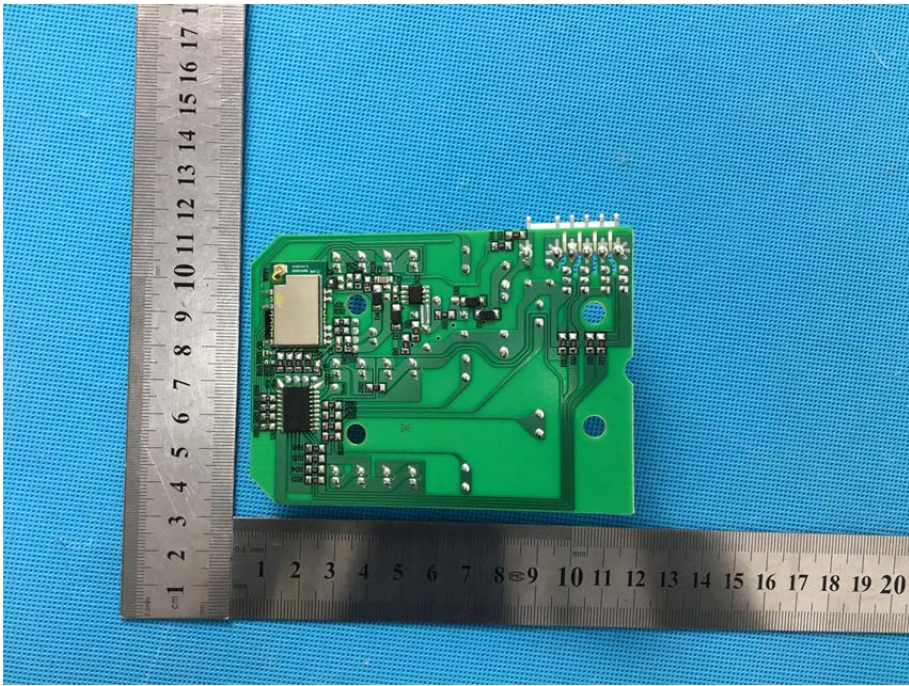

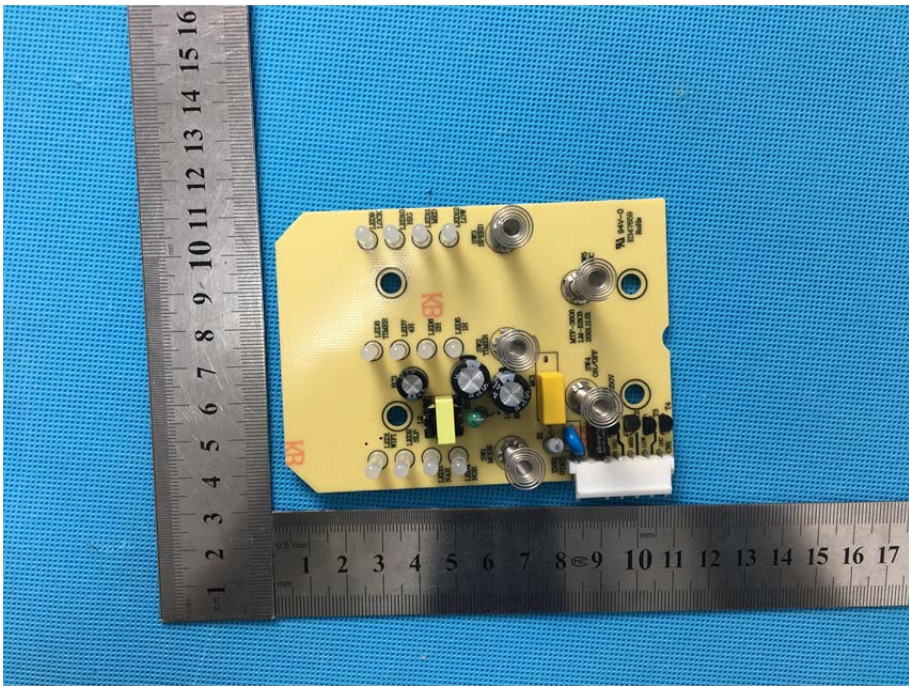

EXHIBIT 3 - EUT INTERNAL PHOTOGRAPHS

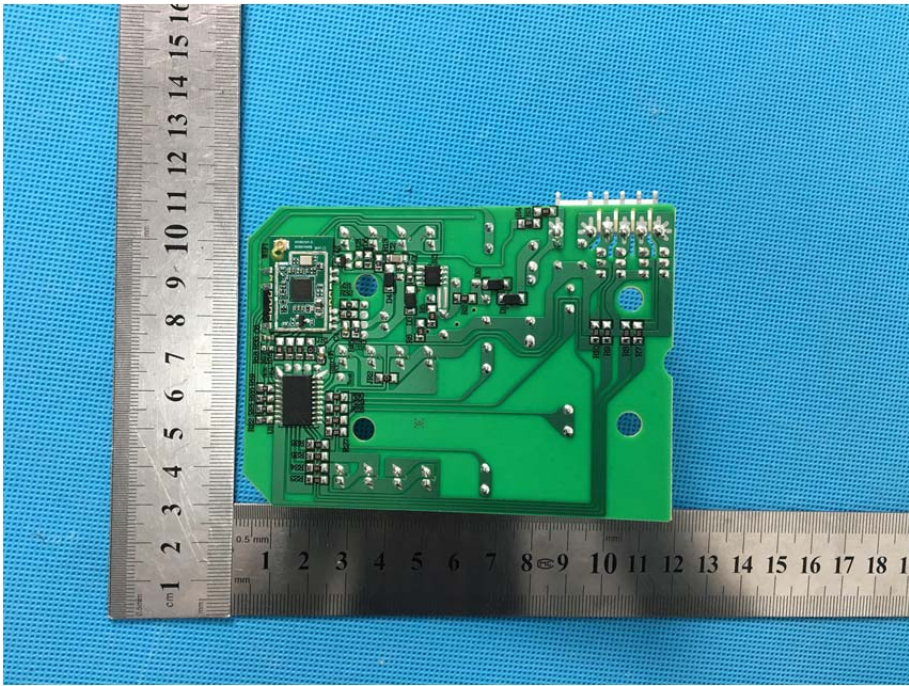

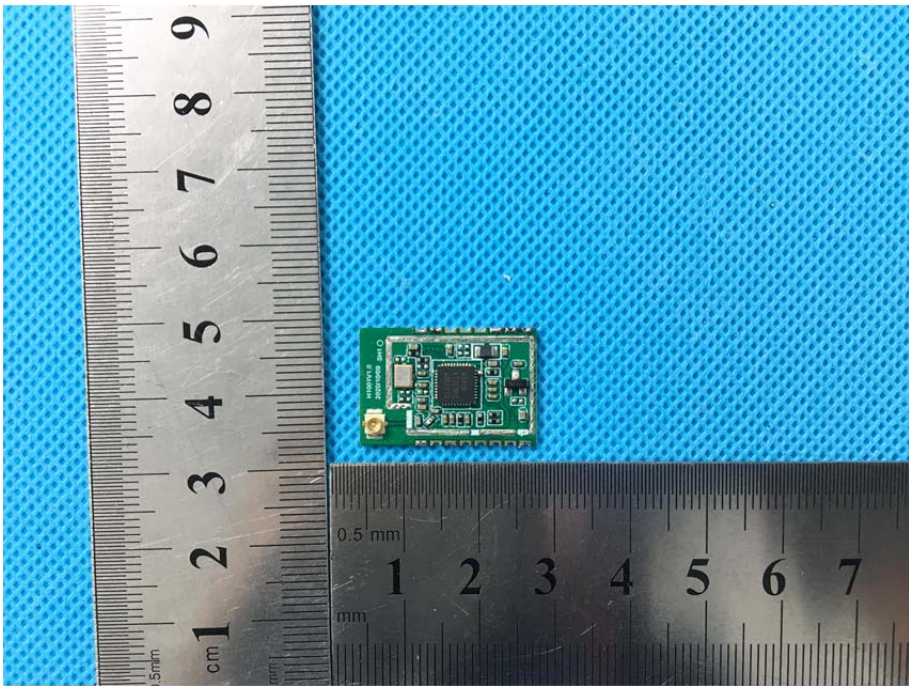

**EUT Housing and Board
View 1**

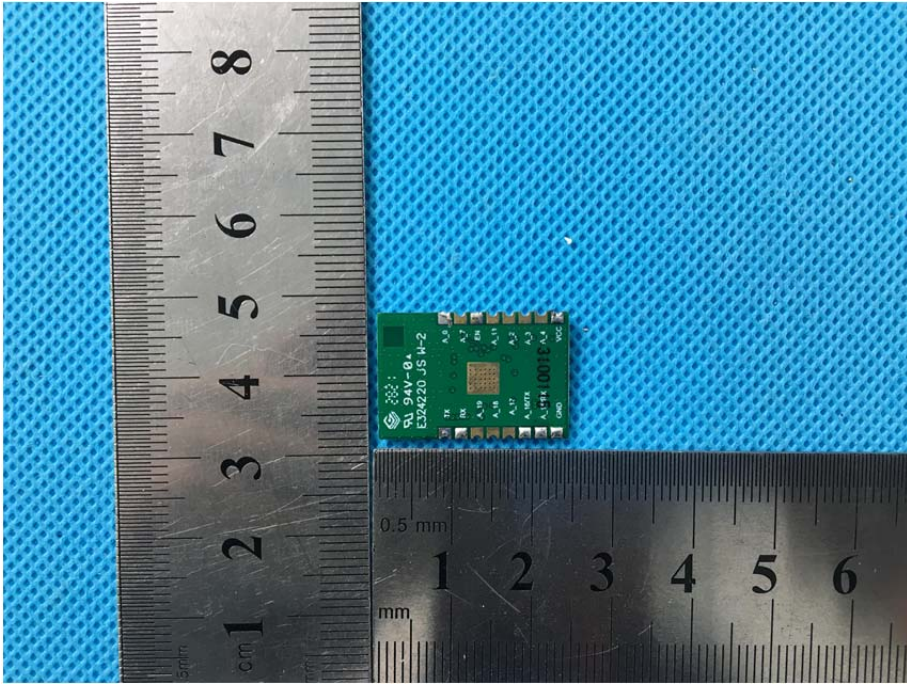

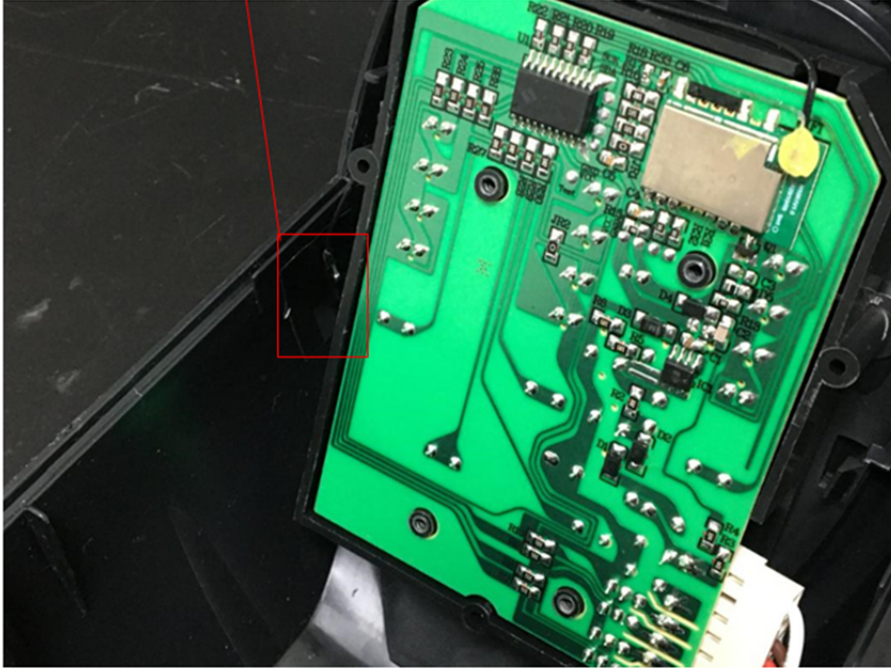

**EUT Housing and Board
View 2**

<p style="text-align: center;">Solder Board-Component View 1</p>	 A photograph of a green printed circuit board (PCB) with various electronic components, including a large integrated circuit, resistors, and capacitors. The board is placed on a blue textured surface. A metal ruler is positioned vertically on the left side of the board, showing a scale from 1 to 17 centimeters. Another metal ruler is positioned horizontally below the board, showing a scale from 1 to 20 centimeters.
<p style="text-align: center;">Solder Board-Component View 2</p>	 A photograph of a yellow printed circuit board (PCB) with various electronic components, including potentiometers, resistors, and capacitors. The board is placed on a blue textured surface. A metal ruler is positioned vertically on the left side of the board, showing a scale from 1 to 16 centimeters. Another metal ruler is positioned horizontally below the board, showing a scale from 1 to 17 centimeters.

<p style="text-align: center;">Solder Board-Component View 3</p>	 A photograph of a green printed circuit board (PCB) component, labeled 'View 3'. The component is rectangular with rounded corners and features various electronic components, including a central microcontroller, several integrated circuits, and numerous surface-mount components. It is placed on a blue textured surface. A metal ruler is positioned vertically to the left of the component, showing a scale from 1 to 16 centimeters. A second ruler is placed horizontally below the component, showing a scale from 1 to 18 centimeters. The component's length is approximately 10.5 cm and its width is approximately 4.5 cm.
<p style="text-align: center;">Solder Board-Component View 4</p>	 A photograph of a smaller green PCB component, labeled 'View 4'. This component is significantly smaller than the one in View 3, with a length of approximately 1.5 cm and a width of approximately 0.8 cm. It also features a central microcontroller and other surface-mount components. It is placed on the same blue textured surface. A metal ruler is positioned vertically to the left, showing a scale from 1 to 9 centimeters. A second ruler is placed horizontally below, showing a scale from 1 to 7 centimeters. The component's length is approximately 1.5 cm and its width is approximately 0.8 cm.

<p>Solder Board-Component View 5</p>	 <p>A photograph showing a small green PCB component with gold-plated pins, labeled 'E24220 JS M-2'. The component is placed on a blue perforated metal surface. A ruler is positioned vertically to the left and horizontally below the component for scale. The vertical ruler shows centimeter markings from 1 to 8. The horizontal ruler shows millimeter markings from 0 to 6, with a 0.5 mm scale also visible.</p>
<p>Antenna View</p>	 <p>A photograph of a green PCB populated with various electronic components, including a large square antenna. A red box highlights a specific area on the board, and a red line points from a label 'WIFI/BT Antenna' to this area. The board is mounted on a black plastic housing.</p>
