

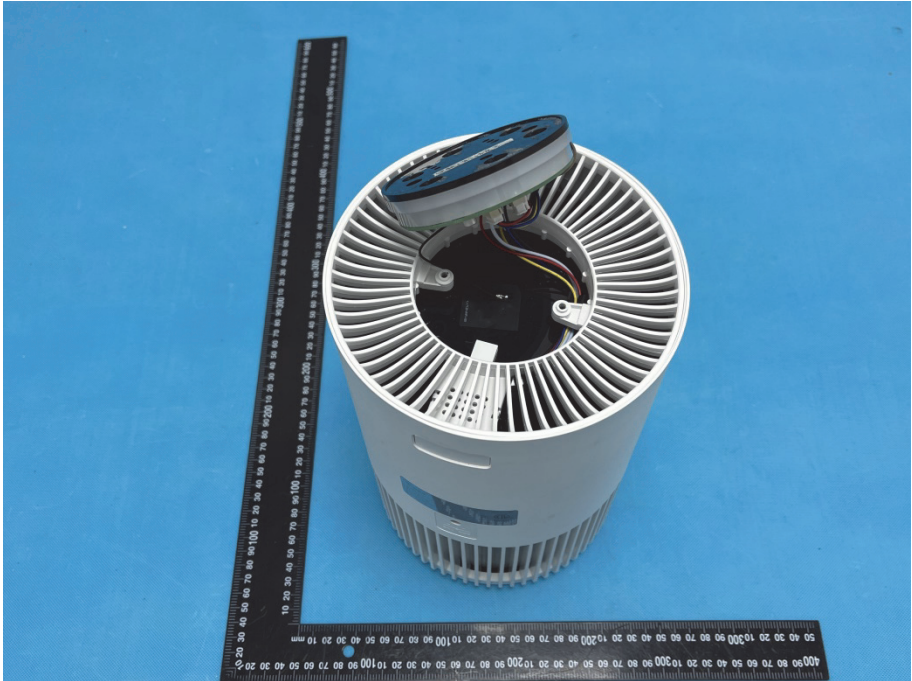

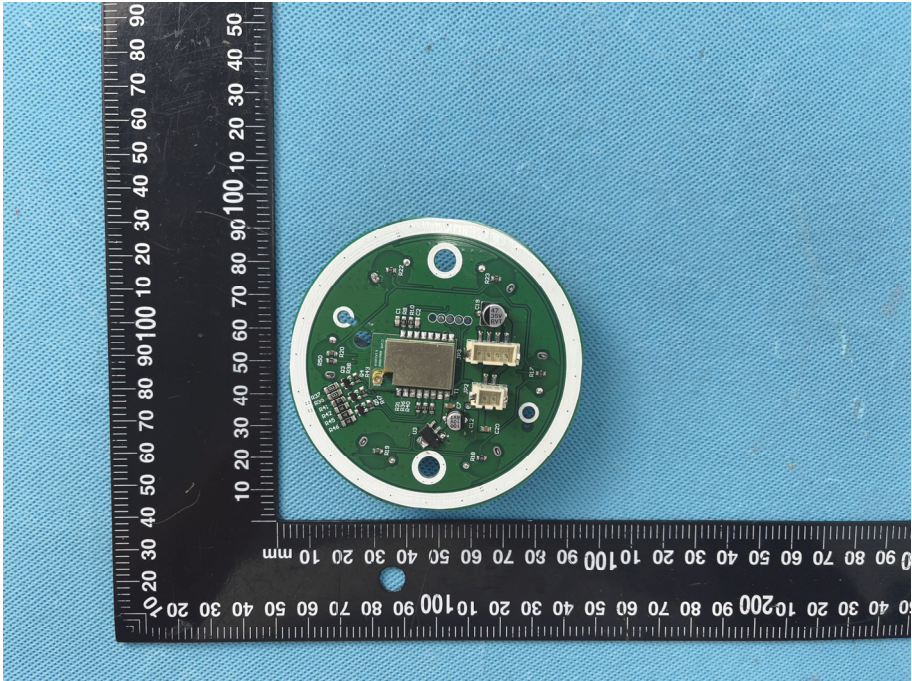

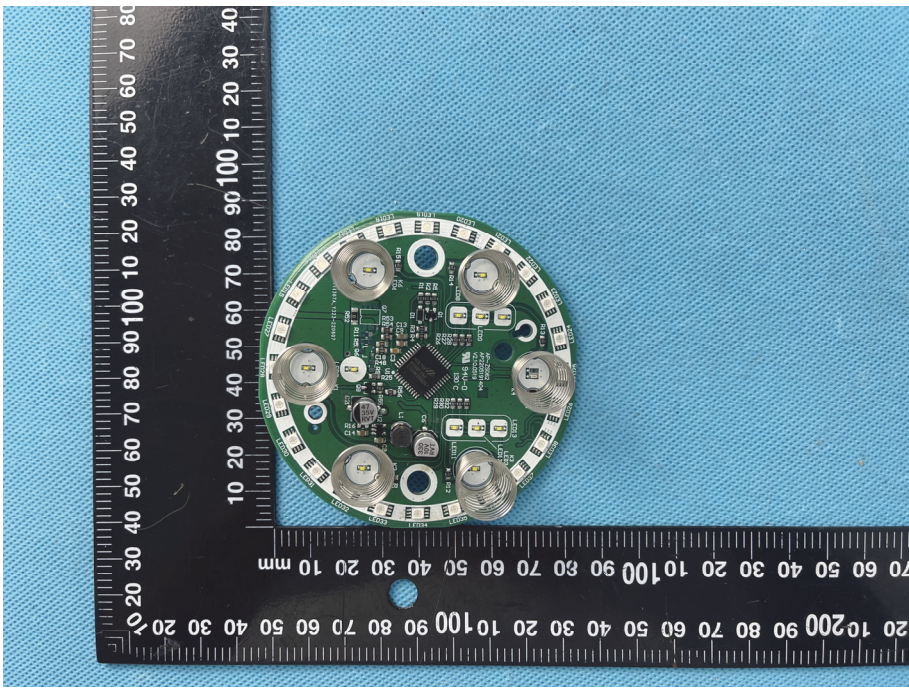

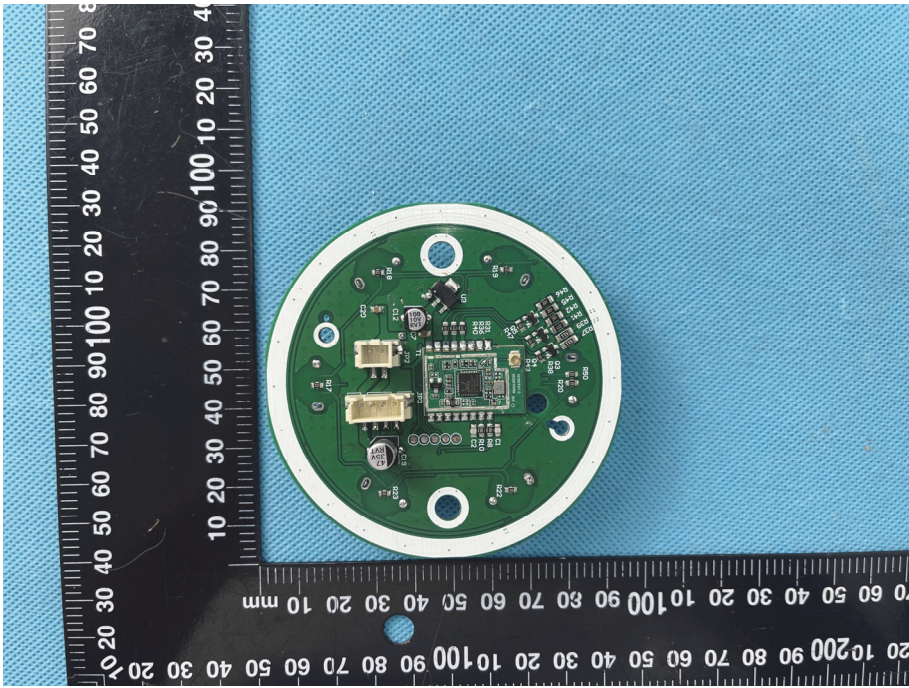

EXHIBIT 3 - EUT INTERNAL PHOTOGRAPHS

<p>EUT Housing and Board View 1</p>	 A photograph showing the internal components of a white, cylindrical EUT housing. The top cover is removed, revealing a green printed circuit board (PCB) mounted inside. A black ruler is placed vertically to the left of the housing for scale, showing measurements in millimeters. The background is a solid blue surface.
<p>Solder Board-Component View 1</p>	 A close-up photograph of the green PCB component. The board is circular and features various electronic components, including a large integrated circuit (IC), several resistors, and connectors. A black ruler is placed vertically to the left of the board for scale, showing measurements in millimeters. The background is a blue textured surface.

<p style="text-align: center;">Solder Board-Component View 2</p>	 A circular green printed circuit board (PCB) is shown from a top-down perspective. The board is populated with several components, including a central microcontroller, various resistors, capacitors, and six large cylindrical components arranged around the perimeter. A black L-shaped ruler is placed next to the board for scale, with markings in millimeters. The board is set against a blue textured background.
<p style="text-align: center;">Solder Board-Component View 3</p>	 A circular green PCB is shown from a top-down perspective, similar to View 2. This board features a central microcontroller, several resistors, capacitors, and two large gold-colored connectors on the left side. A black L-shaped ruler is placed next to the board for scale. The board is set against a blue textured background.
