

<p style="text-align: center;">Solder Board-Component View 4</p>	 A photograph of a small green printed circuit board (PCB) component. The board is rectangular with a notch on one side and a gold-plated connector on the other. It is populated with several surface-mount components, including resistors and capacitors. The board is placed on a blue textured surface next to a black ruler with white markings in millimeters. The ruler shows the component is approximately 40 mm wide and 25 mm high.
<p style="text-align: center;">Solder Board-Component View 5</p>	 A photograph of a larger black PCB component. The board is rectangular and populated with numerous surface-mount components, including resistors, capacitors, and integrated circuits. It features three circular cutouts and a gold-plated connector on one side. The board is placed on a blue textured surface next to a black ruler with white markings in millimeters. The ruler shows the component is approximately 100 mm wide and 60 mm high.

<p style="text-align: center;">Solder Board-Component View 6</p>	 <p>A photograph of a black printed circuit board (PCB) with various electronic components. The board is placed on a blue textured surface next to a black ruler with white markings. The ruler shows measurements in millimeters, with the top edge marked from 0 to 100 and the bottom edge marked from 0 to 100. The board features several connectors, including a USB port, a micro-USB port, and a mini-USB port. There are also several integrated circuits, capacitors, and resistors. The board is oriented vertically in the image.</p>
<p style="text-align: center;">Solder Board-Component View 7</p>	 <p>A photograph of the same black printed circuit board (PCB) as in view 6, but from a different angle. The board is placed on a blue textured surface next to a black ruler with white markings. The ruler shows measurements in millimeters, with the top edge marked from 0 to 100 and the bottom edge marked from 0 to 100. The board features several connectors, including a USB port, a micro-USB port, and a mini-USB port. There are also several integrated circuits, capacitors, and resistors. The board is oriented vertically in the image.</p>
