- 2) Clean the water tank and water float when using the machine first time in a while.
- 3) This unit is with a water filter to against water scale. Please wash the water filter and water tank by 2-3 times when the first use.

### ★ Control Panel Instruction

2

### Power :

Plugging into the power will make a beep sound, and the machine will come to the standby mode. Once you press this power button, the machine will start to work at high level of cool mist and the small LED light III will light on. If you press this button again, the machine will stop working and come to standby mode.

### Mist level control :

Press this key to adjust the mist levels and turn on/ off the Auto Mode

Press 1, the unit works on medium mist level, the related indicator light II lights on;

Press 2, the unit works on low mist level, the related indicator light I lights on;

Press 3, the unit works on Auto Mode, the related indicator light Auto Mode lights on.

Press 4, the unit works on high mist level, the related indicator light III lights on.

Repeating in the same way (medium- low- Auto - high)

### Light control / Night mode :

When power is on

Press 1, the night light is off.

Press 2, the indicator light is off.

Press 3, the night light and the indicator light is on.

Repeating in the same way.

(night light off - indicator light off - indicator light and night light on)

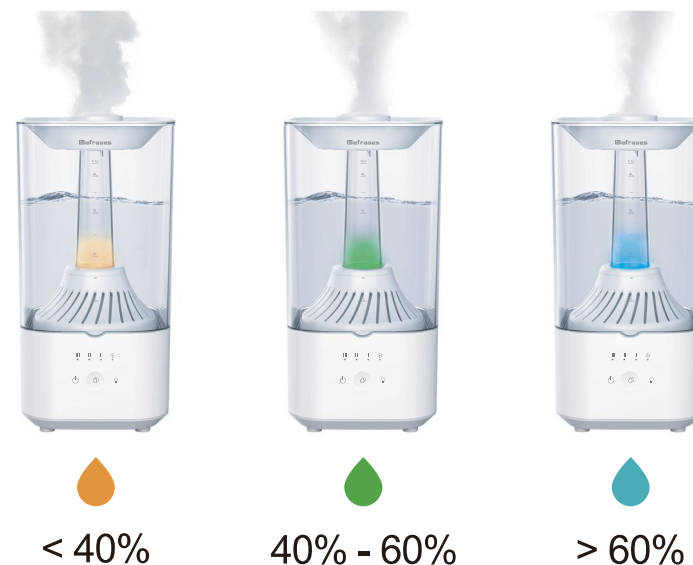

### Auto mode:

Under Auto Humidity mood:

- 1) When the indoor humidity level less than 52%, the unit start working with high speed automatically;
- 2) When the indoor humidity level between 52~57%, the unit start working with middle speed automatically;
- 3) When the indoor humidity level between 57~ 63%, the unit starts working with low speed automatically;
- 4) When the indoor humidity level more than 63%, the unit stop working automatically

Different colors indicate different indoor humidity levels.

- 1) The night light in yellow color, it means the indoor humidity level is less than 40%RH, air is too dry.
- 2) The night light in green color, it means the indoor humidity level is between 40-60%RH, air is comfortable.
- 3) The night light in blue color, it means the indoor humidity level is over 60%RH, air is wet.

## Works with Tuya Smart APP

### Download & Registration:

- 1) Scan the QR code to download “Tuya smart” APP.  
You can also search “Tuya smart” in either App store / Google play to install the APP.
- 2) Open the “Tuya smart” APP, tap sign up to register a “Tuya smart” account with your phone number or E-mail. Then sign in the APP.

### Automatic connection:

- 1) Firstly, it requires the phone's Wi-Fi and Bluetooth to be turned on, enable to connect the devices easily. Secondly, Press the Power button to turn on the humidifier; and then press and hold the Power button for 5 seconds to enter or exit Wi-Fi mode; the 4 white indicators light will flash for 3 times (1s on or 1s off), enters the Wi-Fi matching state.
- 2) Open the “Tuya smart” APP, click “add device” or tap “+” on the top right corner of the APP homepage. The page of adding humidifier will be popped up automatically; after device added successfully, it'll shows “Added and √ “ and on the top right corner shows “Done”.

### Manual connection:

- 1) Press the Power button to turn on the humidifier, and then press and hold the Power button for 5 seconds to enter or exit Wi-Fi mode; the 4 white indicators light will flash for 3 times (1s on or 1s off), enters the Wi-Fi matching state.
- 2) Open the “Tuya smart” APP, click “add device” or tap “+” on the top right corner of the APP homepage. It can be entering the page of “discover devices & add devices”.

- 3) In the homepage of add device manually, choosing “Home appliances” range, and then select “humidifier (Wi-Fi)”, connected with Wi-Fi, the “Tuya smart” APP with 2.4 GHz Wi-Fi(doesn't support 5G GHz), find the device and add, after device added successfully, it'll shows “Added and √ “ and on the top right corner shows “Done”.

After the APP is successfully connected, the 4 white indicators will keep on for 10 seconds; and the current mist level setting indicator light will reduce the brightness by 70%, the other 3 indicator lights will off.

If the Wi-Fi matching fails to connect within 3 minutes, it will automatically exit the Wi-Fi connection. Need to remove the plug from the mains socket to fully turn off the humidifier for 10 seconds, then plug in, re-press and hold the power button for 5 seconds to re-match the Wi-Fi. The network is automatically reconnected when disconnected.

### Configure family members:

If you want family members to connect to with Tuya smart APP, please follow the configuration methods:

Click on “Me”;

Click on Home Management;

Click on create a home;

Enter “Home Name” to create a group name;

Click the group name;

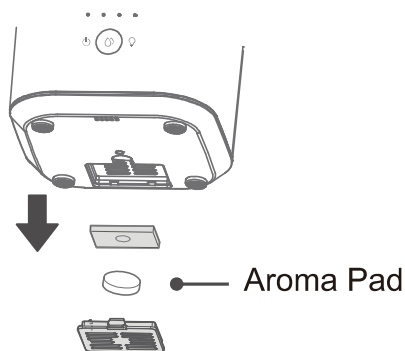

Click on Add member, share with Facebook, Twitter, Tuya smart APP account, or message;

The invitee enters the invitation code;

Connect the Wi-Fi process successfully to use together.

## ★ Operation Procedure

- (1) Fill the water tank no more than the marked water level.
- (2) Plug in the power, and then press the power button. The machine will start working with high mist, and the light III will light on. You can press other buttons for different functions following the Control Panel instruction.
- (3) When the tank is out of water, the indicator light on the water tank will flash 10 times and the machine will stop. Then refill the tank and turn on the machine to start it again.
- (4) If the machine is lifted up during operation, it will stop working. Then put it back down, and turn on the machine to start it again.
- (5) To turn off the machine during operation, press the power button. Then it will stop working and be turned off.
- (6) To use the aroma function, add 3-5 drops of water solubility essential oil onto the aroma pad in the aroma box. When you are done with the aroma function, please take out the sponge and clean and dry it completely before you store the machine.

## IV. Maintenance

- Before cleaning, turn off the machine and pull out the plug.

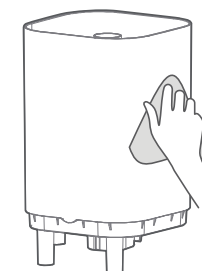

### 1) Transducer

- The water quality in some places is too hard so that the transducer surface might get water scale. Then the transducer needs to be cleaned with a cleaning agent.
- Add a little cleaning agent onto the surface of the transducer (more or less depending on the scale). Fill the sink with water and soak in the sink for 10-15 min.
- Clean with a brush until the water scale disappears. Rinse twice with water.
- ☆ Don't clean transducer by any metal or stiffness material or scrape on it to avoid any damage.

### 2) Water tank

- Clean water tank twice a week at least when using the machine frequently.
- Use soft cloth wipe when cleaning the water tank.
- Don't put any acid, alkaline, bleach scour into the tank to avoid damage.

**FCC Radiation Exposure****Statement:**

This equipment complies with FCC radiation exposure limits set forth for an uncontrolled environment. This equipment should be installed and operated with minimum distance 20cm between the radiator & your body.

**FCC Warning**

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions:

(1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

NOTE 1: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

NOTE 2: Any changes or modifications to this unit not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.
