Solder Board-Component View 3	 A photograph of a small electronic component board, likely a sensor or control module, resting on a blue textured surface. The board is yellowish-gold and features a black digital display showing '00'. To the right of the display are several icons: a percentage sign, a battery level indicator, a signal strength indicator, and a heart rate monitor icon. The board has various electronic components, including resistors, capacitors, and a small black circular component. A black ruler with white markings is placed horizontally below the board, showing measurements in millimeters and centimeters.
Solder Board-Component View 4	 A photograph of the same electronic component board from a different angle, showing the underside. The board is green and populated with numerous surface-mount components, including integrated circuits, resistors, and capacitors. A black ruler with white markings is placed horizontally below the board, showing measurements in millimeters and centimeters.

Solder Board-Component View 5	 A photograph of a small green printed circuit board (PCB) component. The component is rectangular and features several gold-colored solder points. It is positioned next to a black L-shaped ruler for scale. The ruler has white markings in millimeters, with the vertical scale ranging from 0 to 100 mm and the horizontal scale ranging from 0 to 100 mm. The background is a blue textured surface.
Solder Board-Component View 6	 A photograph of a small yellow printed circuit board (PCB) component. The component is rectangular and features various electronic components, including a small black integrated circuit (IC) and several gold-colored solder points. It is positioned next to a black L-shaped ruler for scale. The ruler has white markings in millimeters, with the vertical scale ranging from 0 to 100 mm and the horizontal scale ranging from 0 to 100 mm. The background is a blue textured surface.
