

Internal view of SH908WC

The image shows the internal components of the SH908WC device. On the left is a green printed circuit board (PCB) populated with various electronic components, including integrated circuits, capacitors, and resistors. A blue battery pack is visible at the top. To the right of the PCB is a large, circular, pinkish-red inductor with a black core. Below the inductor is a smaller green PCB with additional components. The entire assembly is housed within a black plastic casing, and the background is a blue surface.
