1/6 PRODUCT OVERVIEW

SPECIFICATIONS

Battery 8000mAh Li-Polymer
Output Qi Wireless 5W, 7.5W 10W
2x USB 5V/2A
1x USB-C 5V/2A

Input USB-C 5V/2A
Micro USB 5V/2A
Wireless technology Qi technology
Dimensions 139x69x16mm
Weight 258 grams

Including USB to USB-C cable & manual.

Compatible with Qi Wireless devices (e.g. Apple, Samsung, and others)

USB Type-C™ and USB™ are trademarks of USB Implementers Forum.

2/6 CHARGE YOUR MOBILE DEVICE

PRE CHARGED

All Xtorm chargers are pre-charged. You can instantly start charging your mobile device.

Simply place your smartphone on the surface of the pad and charging starts automatically.

IN THE BOX

POWER BANK WIRELESS 8000 (Qi) WAVE

USB TO USB-C CABLE

MANUAL

This product supports Apple Wireless Fast Charging, which enables you to charge your iPhone at 7.5W.

All Design Series products incorporate the latest Qi wireless charging technology, allowing you to charge compatible devices at speeds of up to 10W.

The Design Series uses quality materials like aluminium and canvas. The fabric on top of the charging pad is finished with an anti-slip "plus" marker, making sure your smartphone is perfectly positioned and doesn't slide off while charging.

Simply place your smartphone on the surface of the pad and charging starts automatically. You don't even have to remove your protective case, all products are engineered in such a way that they easily charge through covers.*

All Xtorm products have a 2 year warranty in case something goes wrong. We ensure that you will receive a replacement if the product fails within 2 years.

* A metal case has a negative effect on the charging process because Qi wireless charging works by using a system of magnetic induction coils.

EN: Warnings

Don't drop, disassemble or attempt to repair the charger by yourself
Avoid exposure to water or high humidity
Don't expose to any heat source
Keep out of reach of children
Don't use in the presence of flammable gas

NL: Waarschuwing

Probeer de lader niet zelf te repareren of te demontieren
Vermijd blootstelling aan water of een hoge luchtvochtigheid
Niet blootstellen aan een warmtebron

FCC Statement

This device complies with part 15 and part 18 of the FCC Rules. Operation is Subject To the following two conditions:

(1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation. Changes or modifications not explicitly approved by the party responsible for compliance could void the user's authority to operate this equipment.

Note: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 and part 18 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

The equipment complies with FCC radiation exposure limits set forth for an uncontrolled environment.

This device complies with Part 18 of the FCC Rules. This equipment generates uses and can radiate

radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Increase the separation between the equipment and any other radio device.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.

METHOD 1

METHOD 1:
Connect the USB-C cable with USB-C IN.

Connect the USB cable to a power adapter or a laptop/PC.

METHOD 2:
Connect a micro-USB cable with micro USB IN.

METHOD 2

MICRO USB
