

Tune up procedure

FCC ID: 2AQQ7-WTS5000

Tune up procedure shall be over the power range or at specific operating power levels.

RF average conduct power range:

►Wi-Fi(2.4G)

Output power of range:

802.11b 12±1dbm

802.11g 10±1dbm

802.11n (HT20) 10±1dbm

Then these appropriate gain settings are stored in each device individually. The user has no possibility to change these settings later on, and during manufacturing each device will be individual calibrated. The measurement is done in fully calibrated setup, which is based on the base station simulator. Furthermore, the highest power level is verified afterwards measurement on three channels (low, middle and high)

Sincerely,

[Name] Kevin Horn
