Class II permissive Change Request

Product Name: Communication Module
Model No: CC3220MOD
FCC ID: 2AQQC-CC3220MOD

Subject: Class II Permissive Change request for FCC ID: 2AQQC-CC3220MOD

We would like to request a Class 2 Permissive Change on the aforementioned FCC ID to include an additional antenna. We have provided an additional test report and RF exposure evaluation to demonstrate compliance with the new antenna. In addition, we have provided a datasheet documenting the new antenna.

The user's manual, external photos, internal photos, schematics, block diagram, operational description and label remain unchanged.

The antenna will include a reverse polarity SMA connector. The connector is considered non-standard and is intended to meet the requirement of FCC Part 15.203.

Sincerely,

Nic Johnson (client's authorized agent)
