## Using the Micro SD/TF card

After this unit is connected with the computer, you will find two moving disks. The first one is the built-in memory disk for this unit and the other is the disk for the Micro SD/TF card. If no card is inserted, the second disk can't be opened. This unit supports

the extension of the  
Micro SD/TF card from 4GB to 32GB.

## **Inserting and Pulling out the Micro SD/TF card**

### **Inserting:**

Put the Micro SD/TF card face up (side with words), and slightly force the card into the socket of the card, i.e., connecting the unit. Under this state, you can play the content in the Micro SD/TF card.

### **Pulling:**

Slightly push the Micro SD/TF, and it will bounce by a section, and then you can take it out.

### **Caution:**

Please perform inserting and pulling operation when power is off! Otherwise, it will lead to the loss or damage of the files within the unit! If no card is inserted, the computer will be unable to perform read and write operation for the disk notes of the later removable disk (Micro SD/TF card).

### **Battery:**

High capacity Polymer battery is used for this unit.

The duration available of the battery power depends on volume, types of playing files and operation of batteries. The tablet can be set up by the user as "user define power off time" or "display setup" to save batteries.

### **Charging:**

This unit can be recharged by Type-C USB port, please charge the tablet only with equipped USB cable and Charger. Other Chargers might damage the machine. Warnings for charging:

1.A new battery may be empty and not charged before you get the tablet.

2.If the tablet is not used for long time, it is better to charge it to full capacity every 2or3 months during storage.

Power adapter is a key component of the portable tablet, which plays a crucial role in keeping the portable tablet's normal work and protecting your security when using the tablet. Long-term customer surveys and after-sales service practice show

that the malfunction of the portable tablet were caused by using inappropriate accessories in

most cases, particularly the power adapter. Use the substandard power adapter will shorten the life of the portable tablet. The voltage instability will seriously affect the normal work of the portable tablet and bring permanent damage on the tablet's performance and reliability. Use the substandard power adapter will also reduce the vocal quality of the tablets. Shutdown the tablet when you do not use it. In addition, use the substandard power adapter will cause combustion and explosion which will disserve the safety of consumers.

## **FCC Statement**

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

Caution: Any changes or modifications to this device not explicitly approved by manufacturer could void your authority to operate this equipment.

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions:

(1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

Specific Absorption Rate (SAR) information:

This Device meets the government's requirements for exposure to radio waves. The guidelines are based on standards that were developed by independent scientific organizations through periodic and thorough evaluation of scientific studies. The standards include a substantial safety margin designed to assure the safety of all persons regardless of age or health. FCC RF Exposure Information and Statement the SAR limit of USA (FCC) is 1.6 W/kg averaged over one gram of tissue. Device types: Device has also been tested against this SAR limit. This device was tested for typical body-worn operations with the back of the device kept 0mm from the body. To maintain compliance with FCC RF exposure requirements, use accessories that maintain an 0mm separation distance between the user's body and the back of the device. The use of belt clips, holsters and similar accessories should not contain metallic components in its assembly. The use of accessories that do not satisfy these requirements may not comply with FCC RF exposure requirements, and should be avoided.
