80.00 mm

Quick Start Guide

1 . Startup and Power off

Startup: Long press POWER key for three seconds, you can enter into startup picture

Power off: Long press POWER, it will popup power off window Click power off is the last step.

2 . Using Tablet Features

- a. Making a call: Make sure a valid sim card has been inserted in the tablet . On Home screen, touch Phone to enter the
- b. Internet: Your device's networking capabilities allow you to access Internet using your browser through Wi-Fi, or LTE.
- C. Photos: In the gallery, you can see captured/saved pictures
- d. Play Music: Using the YT Music Player, you can play your
- e. Camera: Use the Rear and Front cameras to capture

3 . Settings

Wi-Fi: Select Wi-Fi from settings if you wish to use Wi-Fi for your data connection. Open the Wi-Fi settings screen; select it from the network list. Provide your username or password if required.

Mobile Network: Select Mobile data, Roaming, Data usage. Mobile data always online, preferred network type, automatically select network Access Point Name.

Hotspot & Tethering: Tablet can be used as a wireless modem for PCs, Tablets and Mobile Phones.

Notifications: Notifications appear at the top of the screen. You can change the notification alerts settings for applications.

Apps: Using this you can manage your applications in Tablet.

Accessibility: These are the settings to help visually impaired

Date & Time: Enables you to set your device's date and time

Storage: View and manage the data storage in your Tablet.

Safety Information

4. Applications

- Please do not use device during charging. Always disconnect the device from charger before use.
- Keep the device at least an inch away from your body while dialing/answering calls. Do not use the device if the screen is cracked or broken. Cracked or broken screen could cause injury to hands or face.

• Gmail: Email by Google: secure, smart,and easy to use.

 Google Maps: Explore and navigate your world with Google Maps. Find places you'll love, connect with businesses you're interested in, and get around with real-time traffic

Google Play: Google Play is your entertainment unbound. It brings together all of the entertainment you love and helps you explore it in new ways, anytime, anywhere.

Google Play, Gmail and Google Maps are trademarks of Google LLC.

- Avoid using device and batteries to extreme temperature, such as excessively cold, excessively hot, too humid or too dusty. Your device contains electronics parts and circuits, keep them out of the reach of small children.
- Switch off your device in any area with a potentially explosive atmosphere.

FCC Regulations:

This mobile tablet complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

This mobile tablet has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reason protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following

- -Reorient or relocate the receiving antenna.
- -Increase the separation between the equipment and receiver. -Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- -Consult the dealer or an experienced radio/TV technician for

Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

The antenna(s) used for this transmitter must not be co-located or operating in conjunction with any other antenna or

RF Exposure Information (SAR)

This mobile tablet meets the government's requirements for

exposure to radio waves.
This tablet is designed and manufactured not to exceed the emission limits for exposure to radio frequency (RF) energy set by the Federal Communications Commission of the U.S.

The exposure standard for wireless mobile tablet employs a unit of measurement known as the Specific Absorption Rate, or SAR. The SAR limit set by the FCC is 1.6 W/kg. *Tests for SAR are conducted using standard operating positions accepted by the FCC with the tablet transmitting at its highest certified power level in all tested frequency bands. Although the SAR is determined at the highest certified power level, the actual SAR level of the tablet while operating can be well below the maximum value. This is because the tablet is designed to operate at multiple power levels so as to use only the power required to reach the network. In general, the closer you are to a wireless base station antenna, the lower the power output

While there may be differences between the SAR levels of various tablets and at various positions, they all meet the government requirement.

For body worn operation, this tablet has been tested and meets the FCC RF exposure guidelines for use with an accessory that contains no metal and the positions the handset a minimum of 10 mm from the body. Use of other accessories may not ensure compliance with FCC RF exposure guidelines. If you do not use a body-worn accessory and are not holding the tablet at the ear, position the handset a minimum of 10 mm from your body when the tablet is switched on.

The tablet was tested and rated under the American National Standard Institute (ANSI) C63.19-2011 hearing aid compatibility standards. The ANSI standard for hearing aid compatibility contains two types of ratings:

- M-Ratings: Rating for less radio frequency interference to
- T-Ratings: Rating for inductive coupling with hearing aids in

This device complies with the FCC HAC requirements, has also been tested E-Field, H-Field and T-Coil.

M-Ratings: Tablets rated M3 or M4 meet FCC requirements and are likely to generate less interference to hearing devices than tablets that are not rated. M4 is the better/higher of the two ratings. Your device is rated M3.

T-Ratings: Tablets rated T3 or T4 meet FCC requirements and are likely to be more usable with a hearing aid's telecoil than tablets that are not rated. T4 is the better/higher of the two ratings. Your device is rated T3.
